VOL. 11

Online Account Management

Our state-of-the-art website is now fully integrated with our accounting system. Your account will be accurate showing real time updates. Ordering orthodontic products and account management has never been easier. Our system is secure and available 24/7 for your convenience. Visit www.dynaflex.com.

Top Notch Customer Service

DynaFlex® has a talented team of people who care. Our Territory Managers and Customer Care Specialists work with clinician's and staff everyday to build a business partnership and a solid long lasting relationship that we pride ourselves on. Our Team is available to help by phone, 866-346-5665, or online chat, www.dynaflex.com/order!

Worldwide Distribution

We are proud to say that our products are now recognized and used by doctors all over the world due to our high quality standards and excellence in manufacturing.

Advanced Technology

Leading the way is a statement we take to heart. From that we continue to utilize the newest technology and advanced manufacturing techniques delivering the highest level of quality and service in the industry.

Welcome to the DynaFlex® Orthodontic Products Catalog.

We hope you enjoy this edition of our catalog and we look forward to supplying your practice with all your orthodontic product needs.

Important Information

Ordering Information: Online ordering is secure and available 24/7. Enroll in our online system to link to your DynaFlex account. Once enrolled, ordering and reordering are easier than ever. Visit www.dynaflex.com/enroll to get started. If you need assistance or would like to place your order over the phone, our Customer Care Team is available by phone or online chat from 7:30am-5:00pm CST Monday through Friday. If you would like to place an order after hours, our voice mail system is able to receive your order or if you prefer please leave a message and our Customer Care Team will return your call the following business day.

Shipments: Orders placed prior to 2pm CST are shipped the same day. All product orders are shipped UPS Ground Service. However, we offer 2nd Day, 3rd Day and Next Day Air Service upon request for an additional fee. International orders are shipped by customer's requested service or by most economical service when not specified.

Product Returns: In accordance with FDA and ISO Regulations, all product returns must include a Return Merchandise Authorization number (RMA) which can be obtained by contacting our Customer Service Department. Products may be returned for credit within 30 days from invoice date. Returns must meet quality inspection standards, appearance and physical count. After 31 days and up to 60 days from the invoice date, a request for return will be evaluated by a Customer Service Representative as a courtesy to our customer. For returns during the 31-60 day period products that are accepted for return may be subject to a 20% restocking fee. Custom imprint orders, hot stamped orders and pre-welded band assemblies are not accepted for return/credit. No return or credit will be issued for products over 60 days from invoice date.

DynaFlex® makes every effort to keep pricing consistent, however prices in this catalog, on our website and in sales flyers are subject to change. By purchasing products or services from DynaFlex, you agree to our terms and conditions. To view these, visit www.dynaflex.com.

THE Norris SYSTEM

The Norris 20/26® System is a new dimension in treatment efficiency and by far the most advanced progression in passive self-ligation and arch form technology to date.

Conceived by Dr. Robert "Tito" Norris, it is the culmination of his years of experience in treating with leading passive self-ligating systems, along with his background in mechanical engineering. Together, he was able to identify both the physical attributes and clinical shortcomings of competitive appliances and determine which design elements would most benefit today's practicing orthodontist.

The result is a true twin, passive/active self-ligating appliance system with a reduced slot dimension of .020" x .026", combined with a series of extra broad arch form wires.

- Control Without Compromise
- Improved Workflow
- Clinical Efficiency
- Facial Aesthetics

Request Full Informational Brochure at www.dynaflex.com/norris2026

Dr. Tito Norris

Orthodontist and Creator of The Norris System

In conjunction with DynaFlex®, Dr. Robert "Tito" Norris has developed the Norris 20/26® Bracket System. His unique background in mechanical engineering provides him with a distinct advantage in mastering the forces, vectors, and movements inherent in performing orthodontic treatment.

FEATURES *and* BENEFITS

Nickel-Free Cobalt-Chromium Alloy:

Cobalt chromium not only boasts superior frictional characteristics but is also completely nickel-free.

Integrated Hooks:

Strong integrated hooks accommodate all directions of elastic wear.

Universal Bicuspid Hooks:

Reduces inventory with multiple interchangeable brackets. One bracket serves all upper premolars.

Deep Tie Wing Undercuts:

Optimal tie wing depth for elastic chain, ties or steel ligatures.

.020" x .026" Slot:

Reduced slot dimension delivers unparalleled control. Clinically shown to be 26% more efficient than the leading PSL bracket system.

Rounded Leading Edge Of Door:

Leading edge of door which aids in arch wire seating.

**More About
Norris Brackets
On Page 24-25**

Scan The QR Code To View
The Norris System Products

Center Scribe Line:

Center scribe line aligns the long axis for accurate placement.

Unparalleled Bond Strength:

Engineered to conform to each tooth and create unmatched bond strength.

Straight Occlusal Edge:

The occlusal edge of the new gingivally offset premolar bracket base is straight so that it can more easily be used as a paralleling guide to the marginal ridges of a premolar.

Mesial Distal Span Of Door:

Width of reciprocal door provides additional rotational control.

Self-Ligating Molar Tube

Full 6-6 Self-Ligating System

Flawless. Self-Gliding
DOOR MECHANISM

Unfailing door with reciprocal mechanism and audible opening and closing "click", proven to last throughout treatment. Opening the bracket door has never been easier. Insert the Norris Exclusive "Triple Tool" horizontally into the door slot and rotate 90 degrees. The unique mechanism inside the door of the bracket allows the door to actually "glide open" and "glide closed" once the door travels 50% in either direction. This "assisted" opening and closing is the first and only one of its kind, and is another leap forward in PSL technology.

Norris **EXTRA BROAD** ARCHWIRE

Rounded Rectangular
*Shape Makes The Process
Smoother Than Ever!*

ROUNDED RECTANGULAR

Control Without Compromise

Makes insertion, clip closure, and seating smoother than ever. The sharp corners are rounded so torque control is not compromised.

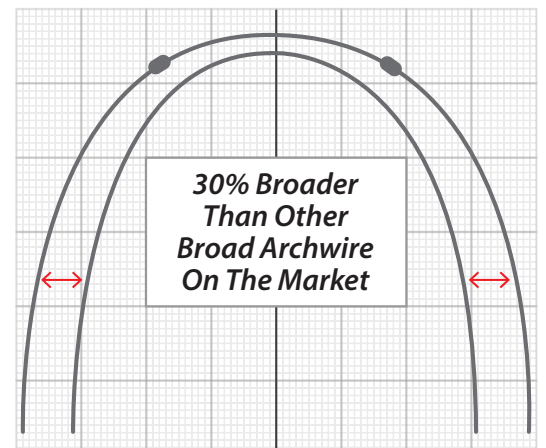

As with the Norris 20/26® Brackets, the Norris Extra Broad wires are a break from convention and take what we know about expanded arches and aesthetic expression to a whole new level. Once again, Dr. Robert "Tito" Norris learned from observation and trial and error, then synthesized what he experienced from the use of existing broad arch forms into the extra broad arch form we have now developed. A non-coordinated arch makes it possible to treat both the maxilla and mandible with the same form. Thirty percent broader than the broadest arch on the market, this extra broad arch achieves a number of key efficiencies and effects: it affords maximum space as it expresses each tooth to its full outer- most potential; it gains maximum leveling and alignment as the teeth are afforded a greater range of motion; it influences the musculature of the surrounding soft tissue earlier in preparation for subsequent desired reprogramming; and it introduces a collaborative dynamic sooner between the bracket and the wire.

Throughout the later working and finishing stages of treatment, a "Rounded" Rectangular (19x25) arch wire is introduced (yet another DynaFlex® exclusive) that makes insertion, clip closure, and seating smoother than ever. Norris Extra Broad Wires are the perfect complement in how they fully express the torque and tip of the bracket over existing passive systems, yet without the binding of other higher frictional systems. Most importantly, however, is how they both fit to produce broader, more expressive smiles than anything else available today.

The Norris Extra Broad Archwires are 30% broader than the broadest arch on the market. This extra broad arch achieves a number of key efficiencies and effects:

- **Maximum Leveling & Alignment**
Teeth are afforded a greater range of motion.
- **Treating Posterior Cross Bite**
The broad shaped archwire can often be effective at correcting crossbites.
- **Produces A Beautiful Broad Smile**
Reduces The Dark Posterior Buccal Corridors and expresses each tooth to its full outer- most potential.
- **Pre-Stopped**
This helps control wire shifting archwire and can be tightened at any position along the arch in accordance with the doctor's preference.
- **19x25 "Rounded Rectangular"**
This "Rounded-Rectangular" NiTi, Beta and Stainless Steel archwire shape makes insertion, clip closure, and seating smoother than ever. Only the sharp corners are rounded so torque control is not compromised.

THE *Norris* SYSTEM

PATIENT CASE

- Initial: Class III with a antereolateral open bite, reverse smile arc, maxillary crowding and mandibular spacing.
- Appointment 1: Brackets were indirectly bonded at initial appointment. Norris Extra Broad, .014" NiTi.
- Appointment 3: Norris Extra Broad, .019 x .025" NiTi. Strong tongue pushed the mandibular anterior teeth into an anterior cross-bite. Mandibular lingual bite turbos & elastic chains were placed to assist in re-capturing positive overjet.
- Appointment 8: Total Treatment Time = 12 months

GLACIER®

Ultra Premium Thermoform Material

Glacier® is an Ultra Premium Thermoform Material that we built for durability, clarity and comfort during treatment. It provides excellent ductility that adapts to undercuts and gingival embrasures, while being flexible enough to allow comfortable insertion and removal. Glacier® offers a high range of activation and memory while applying biocompatible forces with superior aesthetic quality for precise tooth movements. Glacier® is a DynaFlex® proprietary material, manufactured to our specifications and high quality standards.

For Fabrication of Aligners and Retainers

- Durable
- Superior Clarity
- Grab-Force Technology
- Enhanced Tooth Movement
- Box of 100
- Made In The USA

PRECISION Aligner Buttons®

The Only Bondable Buttons Designed Specifically For Clear Aligners.

Scan The QR Code
To Learn More

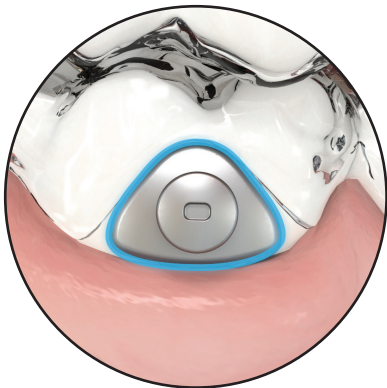

Clear

Precisely fits the cutout windows of upper and lower canines and premolars.

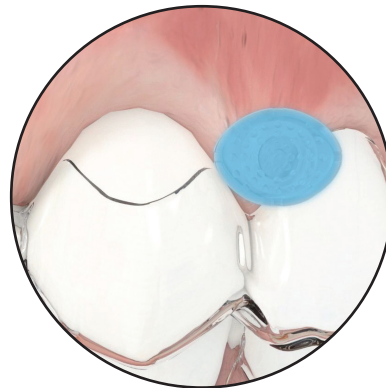

Metal

Created to fit the cutout windows of upper and lower molars.

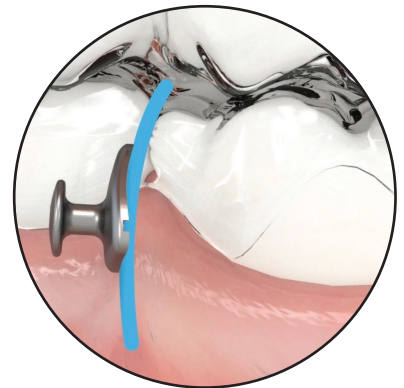

Precise Fit

The shape of the base pad is perfectly tailored to fit the aligner cutout windows.

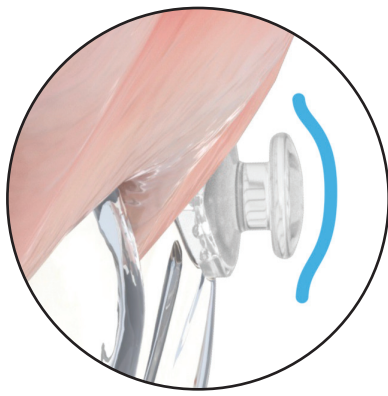

Reliable Bond Strength

The maximized surface area of the base pad prevents detachment.

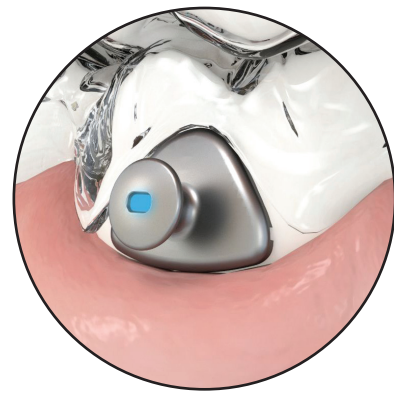

Developed for Gumline Placement

Instead of the center of the crown, our anatomically-contoured base pad matches the shape of the tooth at the gingival third

Engineered Button Head

Our enhanced button head makes it easy to attach elastics of different sizes, improving patient compliance and comfort.

Perfect Placement

The dimple on the button face is intended for precise positioning using an explorer or scaler.

Precision Aligner Button® - Metal

The only bondable button designed for Aligner Therapy. Engineered to fit perfectly within the aligner cut-outs. Contoured to match the shape of the tooth at the gumline. Beveled edges allows base to slide slightly under tray and prevent gum irritation. For best results, program the cut-out in center of tooth. 25 Pack.

#10-PAB10204

Precision Aligner Button® - Clear

The only bondable button designed for Aligner Therapy. Engineered to fit perfectly within the aligner cut-outs. Contoured to match the shape of the tooth at the gumline. Beveled edges allows base to slide slightly under tray and prevent gum irritation. For best results, program the cut-out in center of tooth. 10 Pack.

#10-PABCLR

“Precision Aligner Buttons® are the only buttons we use when incorporating elastics with clear aligners. They give me the control and efficacy that I enjoy with elastic button cutouts, but without the emergency appointments.”

Dr. Neal Kravitz
South Riding, VA

“Precision Buttons® give me the peace of mind of a perfect fit every time on every patient lending to greater comfort and fewer failures. I never imagined they could make such a positive difference and impact but they have!”

Dr. Jonathan Nicozisis
Princeton, NJ

THE ULTIMATE CLASS II & CLASS III CORRECTOR

Simple, Effective, Proven

The all new DynaFlex® exclusive CS®5 System delivers non-compliance treatment for your toughest Class II & Class III cases. The Twist-Lock Pivot was skillfully designed as a one-piece component with no moving parts. This will guarantee a no-hassle installation and improved performance. The widely known CS® spring is made from an exclusive nickel titanium material with specially built key-hole ends that improve the strength and durability by 40%. This spring will load force instantly and remain extremely consistent throughout treatment with the confidence of longer usage. The benefit is a smoother, more constant force that performs better and lasts longer.

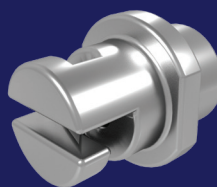

The CS® System creates instant and consistent force levels, providing a smoother, more constant force that performs better and lasts longer. This system is one of the most successful Class II and Class III chairside appliances used in the world due to its simplicity, effectiveness and value pricing as compared to other systems available today. Join the thousands of doctors worldwide that use the CS® System. This is a must have system for your orthodontic tool box.

The Hybrid Screws are coated with blue Nylok™ coating around the threading of the screw. This medical grade material is blue for easy identification and guarantees a more secure fit. Coating the screw threading offers resistance to loosening within the pivot and seals the threading of the screw into place.

BRACKETS

Metal Bracket Lines

DynaFlex® is your total solution for high quality precision direct bonding brackets. Using state of the art materials during the manufacturing process provides controlled tolerance of the slot, low profile materials, and tie wings that are rounded for smooth patient comfort. DynaFlex® uses the best materials and the highest quality systems available, you know the products you are using will exceed your expectations.

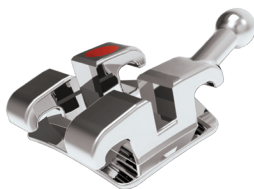

Norris 20/26® Brackets are the flagship Self-ligating System by DynaFlex®.

The bracket provides more control with a unique .020 x .026 slot dimension, while incorporating the best-in class features such as four true tie-wings with undercuts that can accommodate ligature ties and elastic chain; Cobalt- Chromium composition for nickel-free use by allergy-sensitive patients; a flawless door mechanism with "glided" opening and closing; universal bicuspid hooks for reduced inventory; and a mechanical base for trouble-free bonding.

See pages 24-25.

See pages 30-31

The **Atlas Mini** is our most popular twin metal bracket system. Depending on the system of choice, the Atlas bracket line provides specific torque, angulation and rotation; with precise tooth movement and outstanding treatment results.

See pages 26-29.

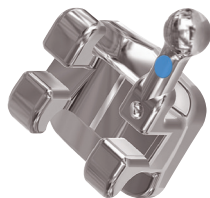

See pages 32-33

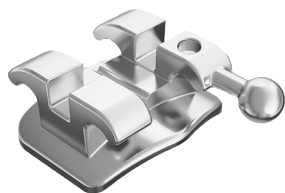

The **Atlas Standard** has the same great features as our Atlas Mini Bracket but 30% larger. Wider tie wing positioning allows for excellent rotational control and the larger base enhances bond strength.

See pages 34-35.

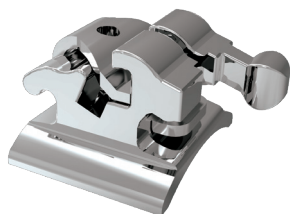

MTX™ Brackets create the perfect smile with unlimited features such as one-piece MIM construction, rounded slot entry, perfectly contoured for great fit, and ultra-smooth slot. Previously known as Artista (Ortho-Direct) & Futura (MAO).

See pages 36-37.

Gemini™ Stainless Steel Bracket offer ultimate full rotational control with their state-of-the-art base design that incorporates torque. Every bracket's compound-contoured base is anatomically designed for an accurate fit. Simplified bracket placement and improved bond strength help make your job easier.

See pages 38-39.

Endurance® Self-Ligating Bracket is a fully interactive self-ligating bracket with a Nickel Titanium spring clip. Clip allows for an exceptional memory characteristic, delivering continuous and consistent forces without deformation.

See pages 40-41.

Aesthetic Bracket Lines

With any of our bracket systems you have the ability to choose a wide range of treatment options that best suits the needs of your practice and treatment protocols. Whether your preference is a stainless steel or aesthetically pleasing brackets, DynaFlex® offers a wide selection for your product needs.

ClearViz+™ Mini is a highly aesthetic bracket made of revolutionary Monocrystalline Sapphire material. With superior strength and durability, the possibilities are endless for those patients looking for cosmetic options.

See pages 42-43.

ClearViz+™ is the same as our ClearViz+™ Mini with a slightly larger mesial distal direction. A clear bracket your patients will love. Previously known as ClearTek (Ortho-Direct).

See pages 44-45.

ClearTek™ Mini Brackets are the ultimate aesthetic bracket. Brackets are crystal clear monocrystalline sapphire, stain resistant, have high bond strength, easy debonding and have a low bracket profile.

See pages 46-47.

The Krystal™ SL is precisely manufactured using a combination of copolymers and ceramics to create a translucent, glass-like appearance for superior cosmetics. This innovative bracket has a super smooth surface that will not stain, break or flex during treatment. Superior aesthetics in a completely clear self-ligating bracket makes this the ideal choice for superior treatment!

See pages 48-49.

Krystal™ Brackets are the choice for a true ceramic bracket! Manufactured from 99.9% pure alumina oxide, these polycrystalline brackets are non-staining and do not discolor. Krystal Brackets are a true twin design offering outstanding bond, high strength, precise tip and torque and are very easy to ligate. Your patients will be pleased with the comfort and aesthetic look! Previously known as Natralyke (Ortho-Direct) and Spectra (MAO).

See pages 50-51.

Norris 20/26[®]

BRACKET SYSTEM

FEATURES *and* BENEFITS

Nickel-Free Cobalt-Chromium Alloy:

Cobalt-chromium not only boasts superior frictional characteristics but is also completely nickel-free.

Integrated Hooks:

Strong integrated hooks accommodate all directions of elastic wear.

Universal Bicuspid Hooks:

Reduces inventory with multiple interchangeable brackets. One bracket serves all upper premolars.

Deep Tie Wing Undercuts:

Optimal tie wing depth for elastic chain, ties or steel ligatures.

.020" x .026" Slot:

Reduced slot dimension delivers unparalleled control. Clinically shown to be 26% more efficient than the leading PSL bracket system.

Rounded Leading Edge Of Door:

Leading edge of door which aids in arch wire seating.

Scan The
QR Code To View
The Norris System
Products

Center Scribe Line:

Center scribe line aligns the long axis for accurate placement.

Unparalleled Bond Strength:

Engineered to conform to each tooth and create unmatched bond strength.

Straight Occlusal Edge:

The occlusal edge of the new gingivally offset premolar bracket base is straight so that it can more easily be used as a paralleling guide to the marginal ridges of a premolar.

Mesial Distal Span Of Door:

Width of reciprocal door provides additional rotational control.

Self-Ligating Molar Tube

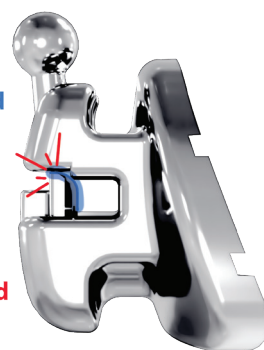

Full 6-6 Self-Ligating System

Flawless, Self-Gliding DOOR MECHANISM

Unfailing door with reciprocal mechanism and audible opening and closing “click”, proven to last throughout treatment. Opening the bracket door has never been easier. Insert the Norris Exclusive “Triple Tool” horizontally into the door slot and rotate 90 degrees. The unique mechanism inside the door of the bracket allows the door to actually “glide open” and “glide closed” once the door travels 50% in either direction. This “assisted” opening and closing is the first and only one of its kind, and is another leap forward in PSL technology.

Atlas Mini Bracket System

A truly exceptional bracket that is perfect in all aspects. Simply put, the Atlas Mini is a bracket you and your staff can rely on. The superior strength and tremendous durability of the Atlas Mini is due to the combined manufacturing of extremely strong stainless steel and the precise brazing technique to add an 80 gauge foil mesh pad. The impressive features of Atlas include: 17-4 stainless steel, 80 gauge foil mesh pad, silky smooth slot and low profile design gives you the confidence to accomplish treatment in the most difficult malocclusions only dreamed of with other brackets. This is the bracket that will make you, your staff and your patients smile brighter!

Available in .018 and .022. Roth, Roth with Offset Base, MBT, MBT with Offset Base and Edgewise Rx.

Atlas Mini *Light Gold* Bracket System

Our Atlas Mini Light Gold brackets are refreshingly beautiful as well as extremely functional. With all the same great features of our Atlas Mini bracket along with the aesthetic appeal of Light Gold, your options have no limits with DynaFlex® bracket systems. The Light Gold bracket retains all the strength and durability of the Atlas Mini as well as the ultra-smooth slot that improves sliding mechanics and enhances patient treatment time. Our exclusive coating process leaves a brilliant, smooth finish without the risk of abrasion or peeling off.

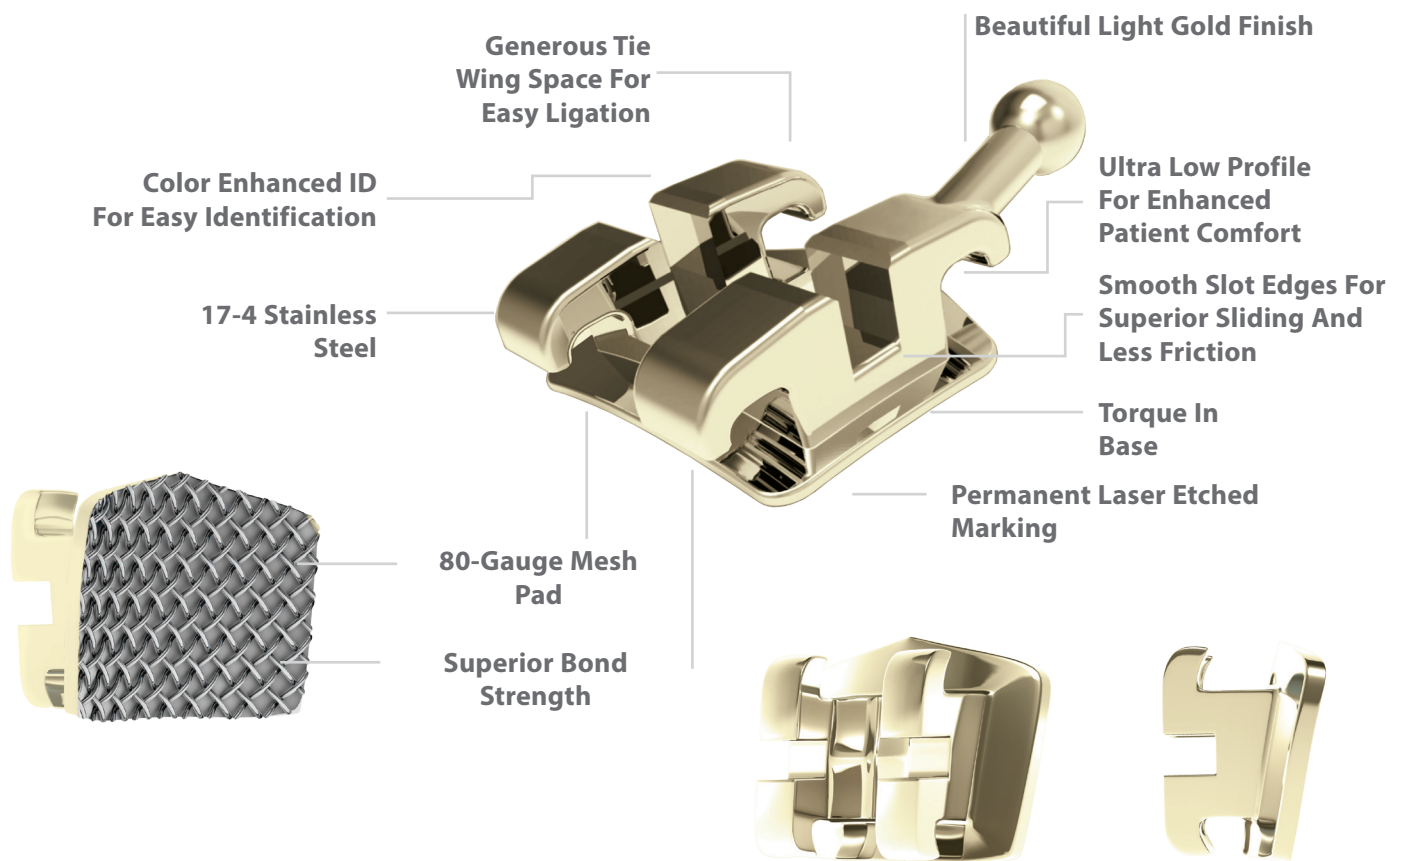

Available in .018 and .022 – Roth or MBT.

Atlas Standard

Bracket System

The Atlas Standard Profile bracket system offers the same features and benefits that our Atlas Mini provides. These standard profile brackets provide excellent bond strength and outstanding control and function. By offering a slightly larger base and with the mesial distal being similar to other larger brackets in the market, we can guarantee greater rotational control.

Available in .018 and .022 – Roth or MBT.

MTX™

MINI-TWIN EXTREME

Bracket System

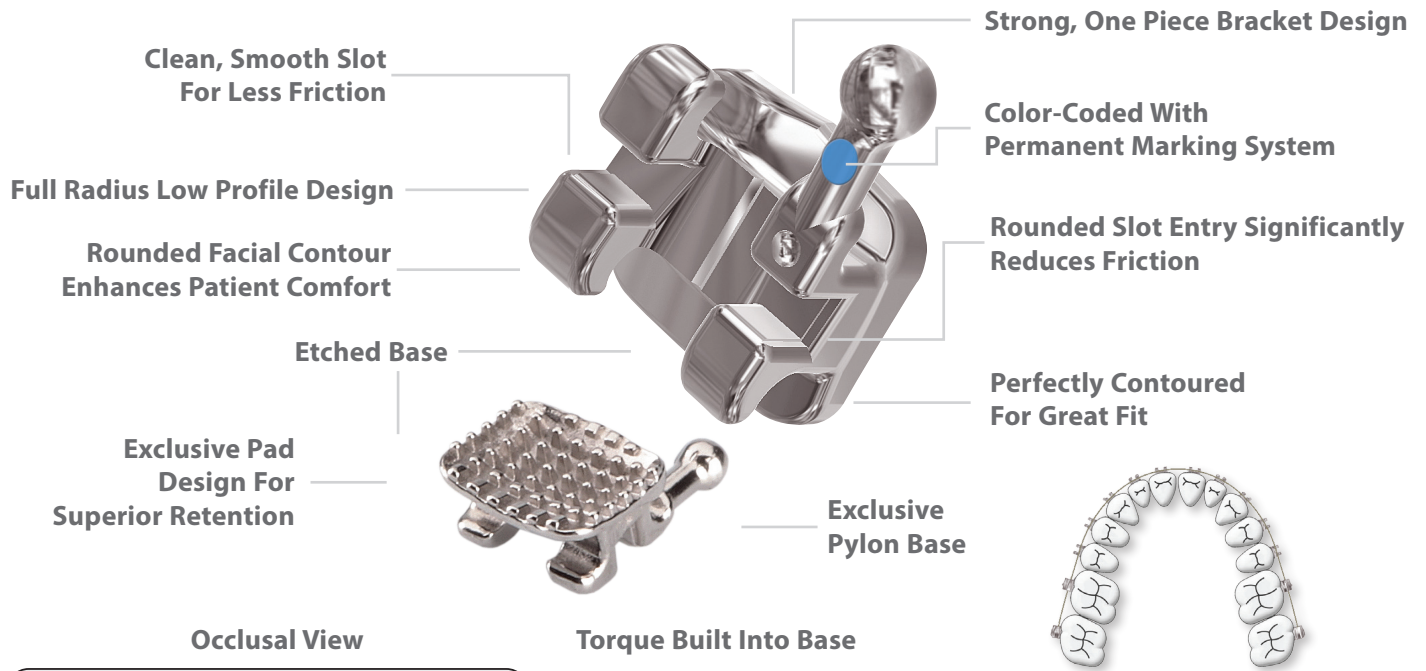

Ensuring full control, torque is built into the base of each bracket and anatomically contoured (mesial-distal/occlusal-gingival) for accurate placement on each tooth. Brackets are engineered with precise angulation, placing the long axis of the root distal to the occlusal portion of the crown, allowing all the roots to align parallel. The anatomical contoured design allows precise bracket placement with all slots aligning at the end of the treatment. The upper centrals and laterals incline in a "plus" torque reading encouraging ideal contact point line-up and enhanced occlusion stability. Each bracket has optimum control to allow teeth to be free of rotations.

Available in .018 and .022 – Roth or MBT.

Combined Effort

Individual bracket thicknesses are built into each bracket and buccal tube (labial-lingual), reducing the need for first order in-out wire bends. The combination of these features easily allows for a flat curve of spee.

GEMINI™

Gemini™ Brackets are made from biocompatible 17-4 Grade Stainless Steel that yields a strong, durable bracket for long term treatment. Gemini™ Brackets offer the ultimate in full rotational control with their state-of-the-art base design that improves bracket placement and bond strength. Gemini™ Brackets have a compound-contoured base that is anatomically designed for an accurate fit. Available in standard and mini sizes.

Endurance®

SELF-LIGATING BRACKET SYSTEM

The all new Endurance® Self-Ligating Bracket System provides similar features to our traditional twin brackets with an integrated Nickel Titanium clip. The exceptional memory characteristic of NiTi ensures reliable operation without the risk of deformation throughout the entire length of treatment. The flexible clip will provide greater leveling and alignment during the early stages of treatment. Once the archwire is increased the bracket becomes active providing greater rotational control. With greater rotational and full archwire engagement, the friction or active part of the bracket will provide greater individual tooth control. The Endurance® Self-Ligating Bracket System delivers all the performance and control you would expect in a self-ligating appliance.

Available in Roth .018 and .022, or MBT .022.

Self-Ligating Instrument
#1444

*We recommend our Self-Ligating Instrument
for easy opening and closing of the bracket door.*

Spring Tension Design
and exceptional memory properties of superelastic Ni-Ti ensure reliable operation without the risk of deformation

Full Slot Width
optimal rotational control

Smooth, Polished Finish
for greater patient comfort

Easy Operation
no special tool needed

Contour Base
for greater control and a precise fit

Tie Wing
ample undercuts for chains or ties

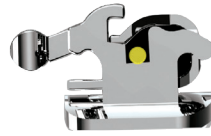

Mechanical Base
Laser technology for superior bonding with reliable and predictable debonding

Palmer Notation
Each bracket base is laser etched with a Palmer Notation to denote the quadrant

Interactive Control

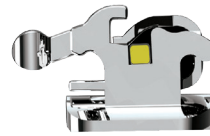

The dynamic interaction between the ligating mechanism and the archwire enables the precise degree of control needed for each phase of treatment.

PASSIVE PHASE

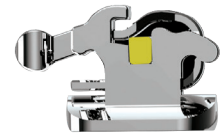

Small, round wires slide freely, minimizing archwire engagement and reducing friction facilitating efficient leveling and alignment.

INTERACTIVE PHASE

Small square or rectangular archwires fill the slot but do not reach the ligating mechanism. This adds control during the working phase for space closure and rotation control and arch form expression.

ACTIVE PHASE

Larger rectangular archwires extend beyond the slot to fully engage the clip, facilitating active control for finishing and detailing.

ClearViz+™ Mini Bracket System

This revolutionary Monocrystalline Sapphire bracket will forever change the way you look and think about clear brackets. The beauty of the ClearViz+™ Mini is that will you give up nothing in treatment and gain the patient satisfaction of using a crystal clear bracket. The endless features of ClearViz+™ Mini include; the superior strength and clarity of Monocrystalline Sapphire, Plasma silica coating for superior sliding mechanics and slot strength, 30% smaller size with perfectly rounded edges for uncompromising patient comfort, infinite bond strength throughout treatment, and the perfection of minimal fracture during debonding. As you can see, there is no equal to the ClearViz+™ Mini in aesthetic orthodontic treatment.

Available in .018 and .022 – Roth or MBT.

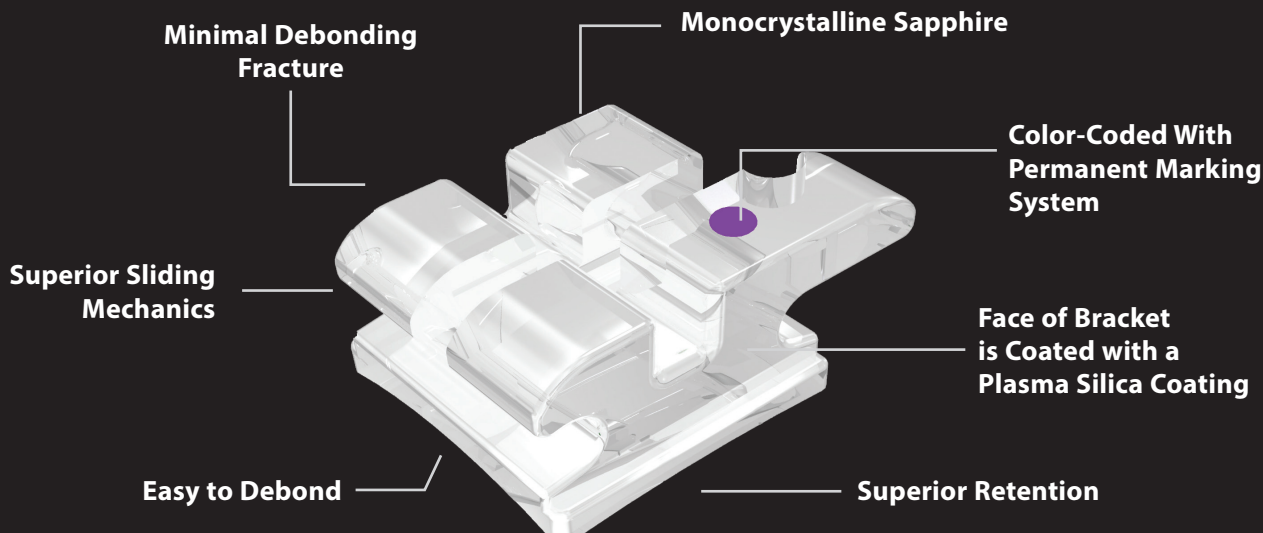

Debonding Tip:

Using a dull Pin & Ligature Cutter or Straight Bracket Removing plier. Grip bracket as close to the bracket pad as possible. Then gently rock back and forth to break adhesive bond.

Silicone Placement Guides
simplify bracket placement!

ClearViz+™

Bracket System

Manufactured of monocrystalline sapphire, these brackets are crystal clear! ClearViz+™ brackets are a low profile bracket with a high bond strength and are stain resistant.

Available in .018 and .022 – Roth or MBT.

Debonding Tip:

Using a dull Pin & Ligature Cutter or Straight Bracket Removing plier. Grip bracket as close to the bracket pad as possible. Then gently rock back and forth to break adhesive bond.

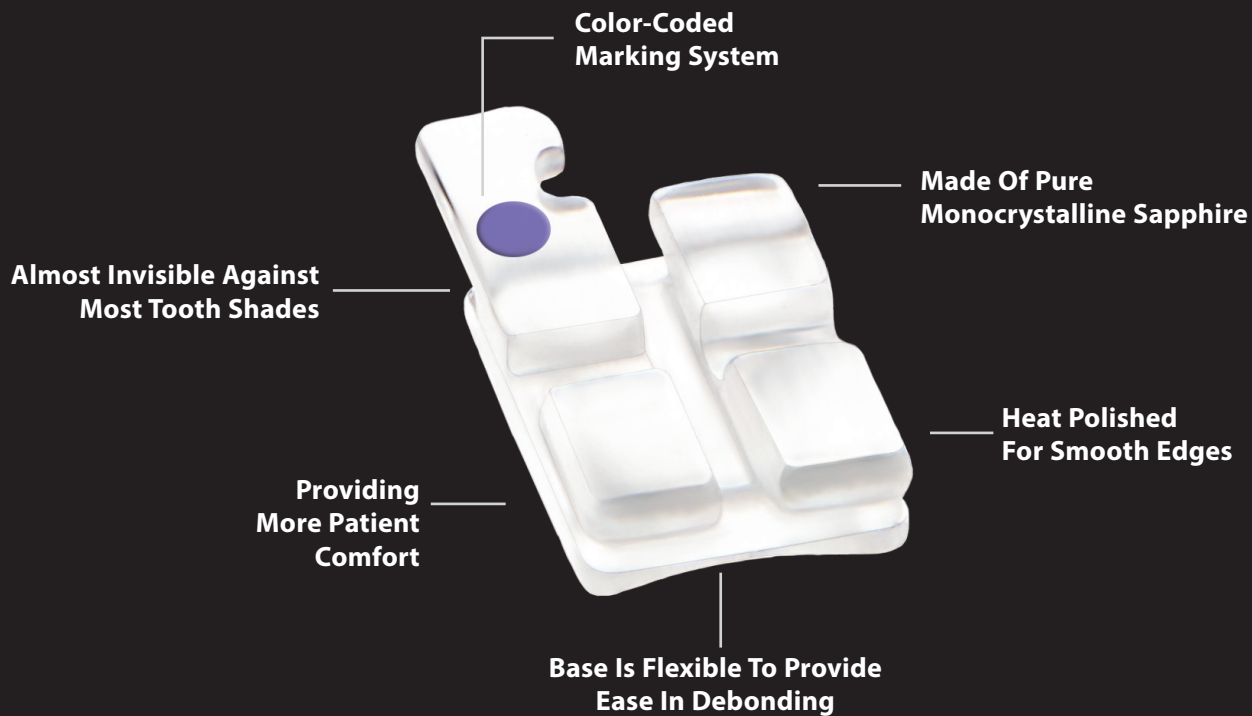

Crystal Clear...Stain Resistant!

ClearTek™ Mini

ClearTek™ Mini Brackets are manufactured using high quality Monocrystalline sapphire material. This material is ideal for bonding but also ideal for when removing brackets post treatment. The design of the slot reduces friction, even with the use of larger wires. Low profile with rounded edges provides excellent patient comfort with the results doctor's strive for. ClearTek™ Mini Brackets provide outstanding clarity and naturally blends with any tooth shade.

- Crystal clear monocrystalline sapphire
- Stain resistant
- High bond strength
- Easy debonding
- Low bracket profile

Krystal™ SL

Self-Ligating Bracket System

Introducing the new Krystal™ SL Bracket System! The Krystal™ SL is manufactured using a combination of copolymers and ceramics which create a translucent glass-like material for superior cosmetics and smooth finish for comfort. With torque in the base for excellent control, the clear clip provides enhanced aesthetics. Mechanical locking base with grooves allows for adhesive to be distributed easily along the bracket base. Bracket base is formulated to minimize breakage during debonding. This new innovative bracket has a super smooth surface which will not stain, break or flex during treatment. Easy to open and close for treatment, dependable, clear and comfortable, making the Krystal™ SL the perfect choice for both practices and patients!

Available in .018 and .022 – Roth or MBT.

Debonding Tip:

Using a dull Pin & Ligature Cutter or Straight Bracket Removing plier. Grip bracket as close to the bracket pad as possible. Then gently rock back and forth to break adhesive bond.

We recommend our Self-Ligating Instrument for easy opening and closing of the bracket door.

Self-Ligating Instrument
#1444

Easy to use!

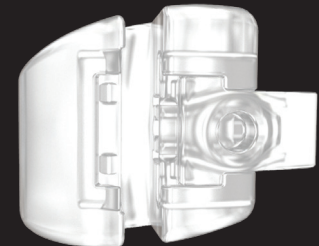

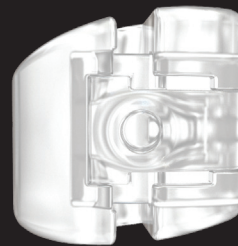

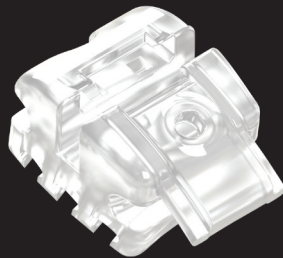

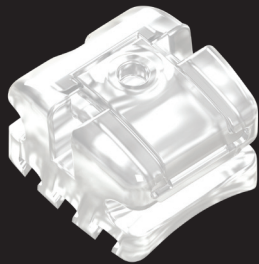

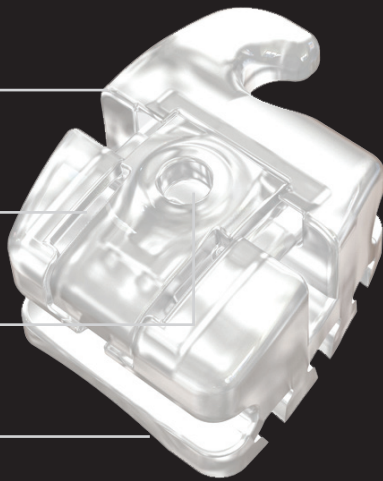

Place a tweezer or explorer onto the bracket, making sure the tool fits exactly in the door slot, pull the tool smoothly from the gingival to the occlusal and the door will open. Close the door using tweezers, tool or your fingers. Door is completely closed when you hear a "click".

Krystal™

Ceramic Bracket System

Krystal™ Brackets are the choice for a true ceramic bracket! Manufactured from 99.9% pure alumina oxide, these polycrystalline brackets are non-staining and do not discolor. Krystal™ Brackets are a true twin design offering outstanding bond, high strength, precise tip and torque and are very easy to ligate. Your patients will be pleased with the comfort and aesthetic look!

Available in .018 and .022 – Roth or MBT.

Debonding Tip:

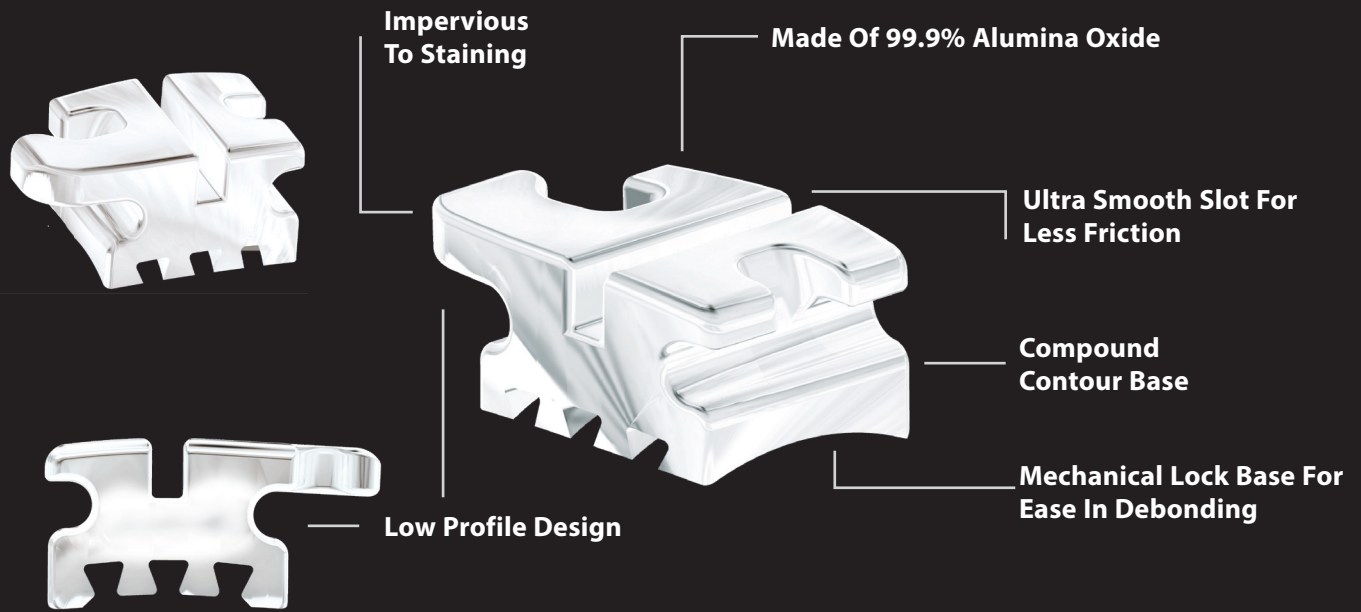

Using a dull Pin & Ligature Cutter or Straight Bracket Removing plier. Grip bracket as close to the bracket pad as possible. Then gently rock back and forth to break adhesive bond.

BANDS & ATTACHMENTS

Atlas 1st Molar Bands

The new Atlas Molar Bands have been designed for maximum retention and superior fit. The interproximal dimensions have been reduced for less tissue impingement and each band provides outstanding contour to both occlusal and gingival which reduces wash out. The occlusal edge of the band has been designed for increased strength in the seating process and the interior has been micro-etched for better retention. Half sizes are now available for proper fit and function.

** Band In Photo Shown With Tube As Example Only. Bands Are Sold Without Tubes, Tubes Sold Separately.*

Ultra-Fit™ 1st Molar Bands

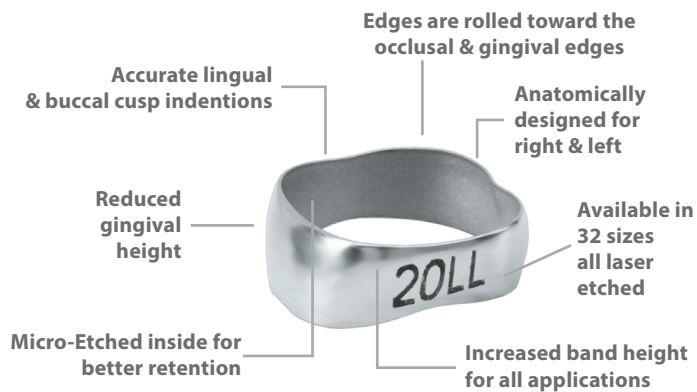

Ultra Fit™ Molar bands were designed with proper molar anatomy and form in mind. The DynaFlex® molar band has been manufactured to the highest standards of consistency and quality. The gingival rolled edges will reduce band wash-out. The reduced interproximal area ensures precise fit and maximum retention during cementation.

Placement

Buccal Tube to Upper Molar

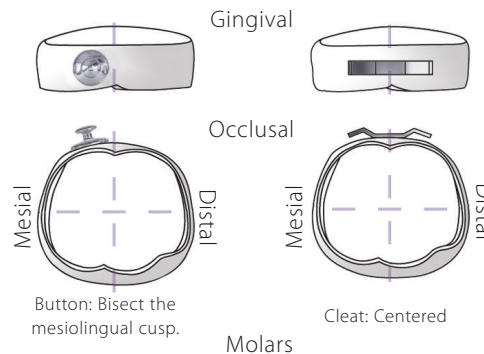

Upper Molar: Entrance to buccal tube will bisect the mesial/buccal cusp.

Buccal Tube to Lower Molar

Lower Molar: Entrance to buccal tube will bisect the mesial/buccal cusp.

Lingual Attachments

Please specify if you prefer a different position.

DynaFlex® Pedodontic Molar Bands

General purpose bands in pedodontic sizes. Completely festooned for easy and accurate fit every time. Narrow and seamless to accommodate both second primary and permanent molars. Bands are universal left to right and are available individually or in pre-packaged kits. Attachments available at additional charge.

Pre-Packaged Kits:

#230-001 Upper Pedo Molar Band Kit (60 bands; 10 each size)

#230-002 Lower Pedo Molar Band Kit (60 bands; 10 each size)

Ultra-Fit™ Bicuspid Bands

Ultra-Fit™ Upper & Lower Bicuspid Bands

Ultra-Fit™ Molar bands were designed with proper molar anatomy and form in mind. The DynaFlex® molar band has been manufactured to the highest standards of consistency and quality. The gingival rolled edges will reduce band wash-out. The reduced interproximal area ensures precise fit and maximum retention during cementation. Anatomically contoured to ensure a precise fit and maximum adaptation during cementation. Band size is permanently laser etched for easy identification, even after sterilization. Available individually or in pre-packaged kits, plain or pre-welded.

- **Ultra-Fit™ bicuspid band provides sufficient hardness to avoid collapsing when seated.**
- **DynaFlex® offers in-house custom welding on all bicuspid & molar bands with buccal attachments as well as lingual attachments. We use high-speed factory grade welders and skilled technicians to ensure optimum placement on all your custom welding. Custom welded orders are non-returnable.**
- **Universally shaped with true fit and accurate function. With distinctive shape and sizes, all bands are laser marked and have a full-size range for maximum retention.**

* Allow 14 business days for welding service.

Stability™

Buccal Tubes

Comfort Is In The Design

Advanced casting technology allows for not only increased strength, but also the freedom of design to produce smaller precision tubes to increase clinical efficiency and patient comfort. Both occlusal interference and gingival impingement are reduced, and hygiene is improved. All convertible tubes incorporate a true "twin" bracket tie wing design to aid in ligation. Our combination tubes also incorporate a distinctive tie wing design for secure ligation following archwire slot conversion, and are offset from the gingival to avoid tissue impingement.

Our Stability™ Buccal Tube line offers miniaturized cast buccal tubes with rounded surfaces for exceptional patient comfort and acceptance.

Available in Bondable or Weldable

All Stability Buccal Tubes are available in a Weldable or Bondable base. Weld your own buccal tubes in your office or allow us to weld for you. complimentary welding service is no extra charge. Please allow 14 business days for welding services. Pre-welded band assemblies are custom and are non-returnable.

See Pages 64-65 For Further Information

buccal tubes

DynaFlex® Autoclavable Bite Stick

Brighten your office with these colorful bite sticks! Bite sticks are autoclavable up to 260 degrees or cold sterilizable.

#1426-05

DynaFlex® Heavy Duty Band Pusher

Manufactured of high quality surgical Stainless Steel, this instrument offers quality and durability and provides a firm grip allowing for superior control when seating bands of all types.

#1420

DynaFlex® Posterior Bracket Tweezer - Small

Similar to our standard bracket tweezer but with smaller, angulated beaks allowing for more visibility when placing brackets. Reverse-action provides for ease in loading and firm grip. Overall length is 4 1/2".

#1417

DynaFlex® Buccal Tube Instrument

Don't miss out on the convenience of this product! This instrument makes placing molar brackets much easier than ever before! The instrument has a very slender tip that inserts easily into the slot on the molar bracket. The reverse-action tweezer allows for precise and easy placement of the molar bracket.

#1400-676

Archwires
In The Industry...**

Norris **EXTRA BROAD** ARCHWIRE

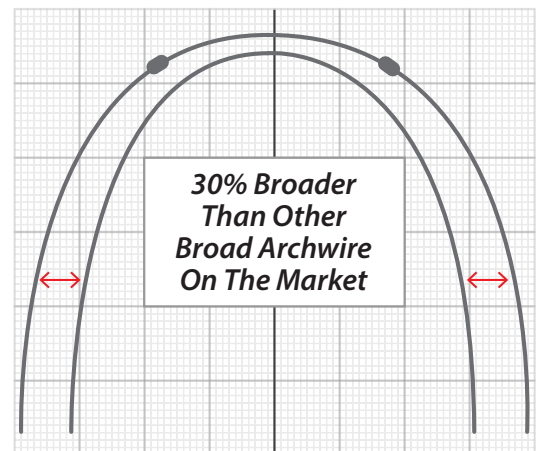

As with the Norris 20/26® Brackets, the Norris Extra Broad wires are a break from convention and take what we know about expanded arches and aesthetic expression to a whole new level. Once again, Dr. Robert "Tito" Norris learned from observation and trial and error, then synthesized what he experienced from the use of existing broad arch forms into the extra broad arch form we have now developed. A non-coordinated arch makes it possible to treat both the maxilla and mandible with the same form. Thirty percent broader than the broadest arch on the market, this extra broad arch achieves a number of key efficiencies and effects: it affords maximum space as it expresses each tooth to its full outer- most potential; it gains maximum leveling and alignment as the teeth are afforded a greater range of motion; it influences the musculature of the surrounding soft tissue earlier in preparation for subsequent desired reprogramming; and it introduces a collaborative dynamic sooner between the bracket and the wire.

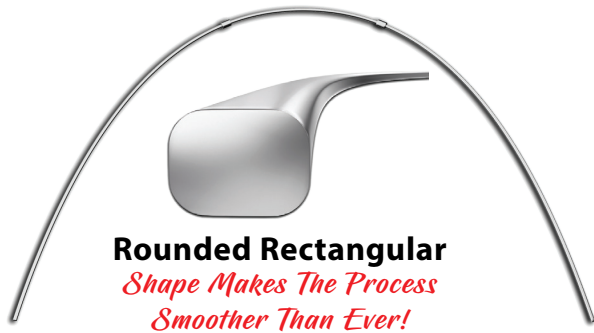

Throughout the later working and finishing stages of treatment, a "Rounded" Rectangular (19x25) arch wire is introduced (yet another DynaFlex® exclusive) that makes insertion, clip closure, and seating smoother than ever. Norris Extra Broad Wires are the perfect complement in how they fully express the torque and tip of the bracket over existing passive systems, yet without the binding of other higher frictional systems. Most importantly, however, is how they both fit to produce broader, more expressive smiles than anything else available today.

The Norris Extra Broad Archwires are 30% broader than the broadest arch on the market. This extra broad arch achieves a number of key efficiencies and effects:

- **Maximum Leveling & Alignment**
Teeth are afforded a greater range of motion.
- **Treating Posterior Cross Bite**
The broad shaped archwire can often be effective at correcting crossbites.
- **Produces A Beautiful Broad Smile**
Reduces The Dark Posterior Buccal Corridors and expresses each tooth to its full outer- most potential.
- **Pre-Stopped**
This helps control wire shifting archwire and can be tightened at any position along the arch in accordance with the doctor's preference.
- **19x25 "Rounded Rectangular"**
This "Rounded-Rectangular" NiTi, Beta and Stainless Steel archwire shape makes insertion, clip closure, and seating smoother than ever. Only the sharp corners are rounded so torque control is not compromised.

**Norris
"Double-Take"
Mouth Mirror
Page 137.**

ROUNDED RECTANGULAR

Control Without Compromise

Makes insertion, clip closure, and seating smoother than ever. Only the sharp corners are rounded so torque control is not compromised.

Dyna Ti Nickel Titanium Archwires

Super Elastic Nickel Titanium

Only the highest-grade raw material will meet our standards for manufacturing! We say, "Start with the best, end with the best!" Our Super Elastic Nickel Titanium outperforms all others while leaving plenty of money in your pocket! Extremely long working range and ultra smooth finish will produce guaranteed results every time!

- Low forces for greater patient comfort
- Lighter forces for easier ligation in difficult cases
- Improved resiliency to permanent deformation
- Ideal for patients with significant crowding
- Ability to place heavier wires in earlier
- Compare to Copper NiTi™ 35°C and GAC Sentalloy
- DynaTherm Plus wire delivers 200gm of force

CNA™ Archwire

Beta Titanium Alloy - The Alternative To TMA™

We went a step beyond TMA™. CNA™ improves bending characteristics and has a smoother surface to improve the sliding mechanics. This is the optimum nickel free alloy that takes intricate bends and is about as half as stiff as stainless steel. Available in proform shape with extended ends for extra detailing. Pack of 10.

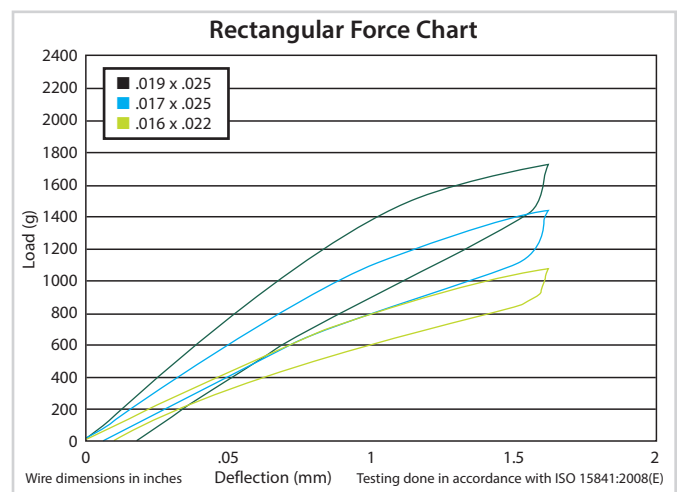

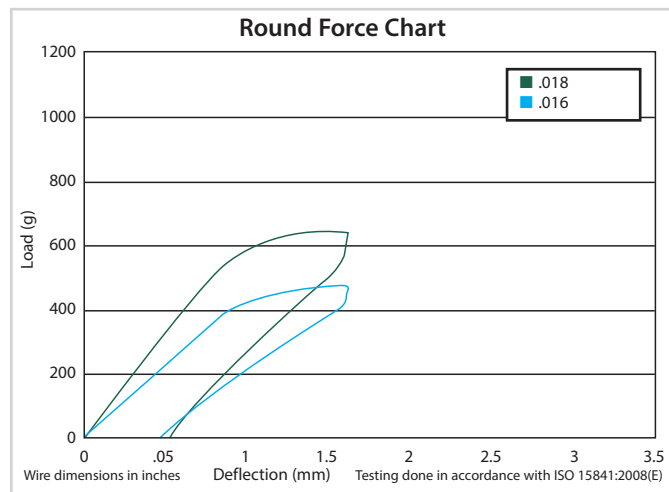

- Nickel - Free
- Low force - deflection rate
- Weldable
- Low modules of elasticity.
- Can be deflected 100% more than stainless steel without permanent deformation.
- Constant forces over longer period of time.
- Compare to TMA™

Copper NiTi

Ensures True Activation

Introducing a Copper NiTi wire that exceeds clinical expectations and surpasses other copper archwire. Our Copper NiTi has extremely good control over tooth moving loads and superior balance of force levels. With a silky smooth finish and very gentle loading for early engagement, this wire will exceed all your expectations. Pack of 10.

Bioflex3[®]

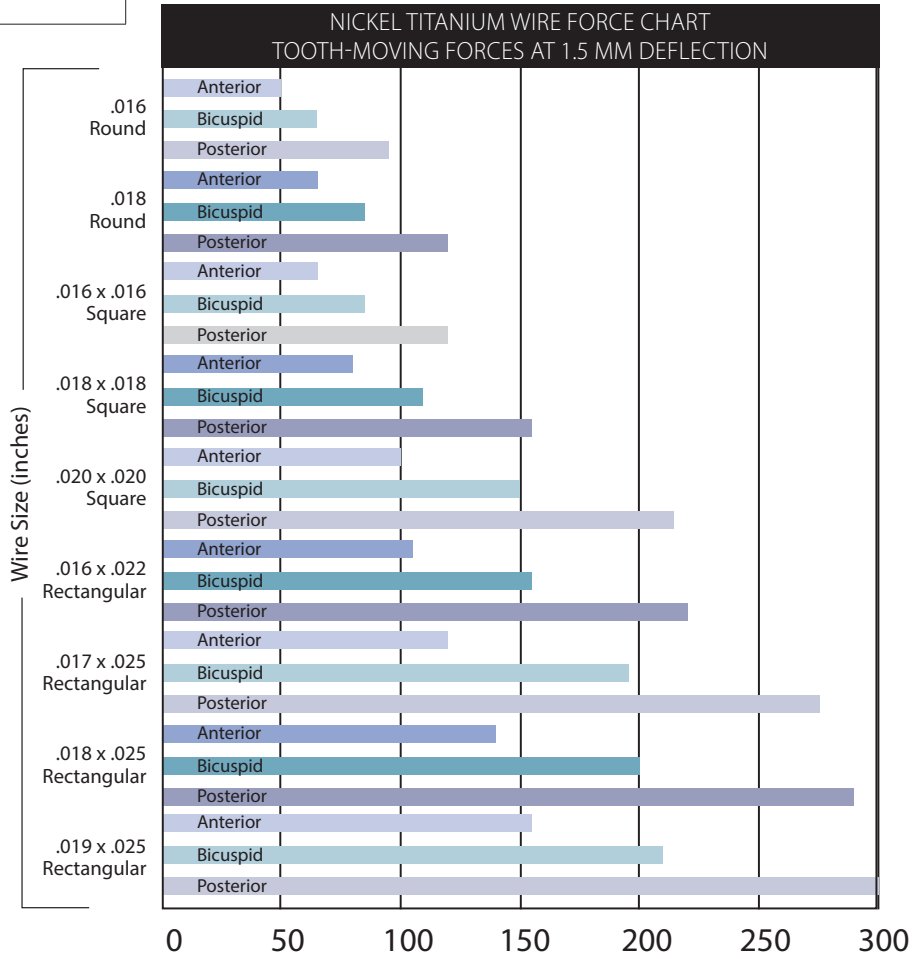

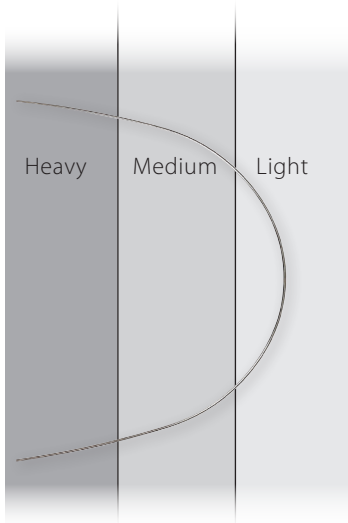

Heat Activated, Multi-Force Nickel Titanium

- Three distinct force regions in one archwire.
- Heat activated, multi-force Nickel Titanium wire.
- Ideal biological forces for efficient tooth movement.
- Reduce the number and frequency of wire changes.
- Almost half the price of comparable wires.
- Compare to GAC BioForce[®].
- Pack of 10.

Three Distinct Force Regions

GAC Bioforce[®] archwire is a registered trademark of GAC Dentsply[®].

3-Point Bend Test performed on a 10mm wire span.

Wire tested in the Buccal-Lingual plane to allow for curvature of the archwire.

DynaTorque™ Archwires

Ideal For Passive, Self-Ligating Bracket Systems

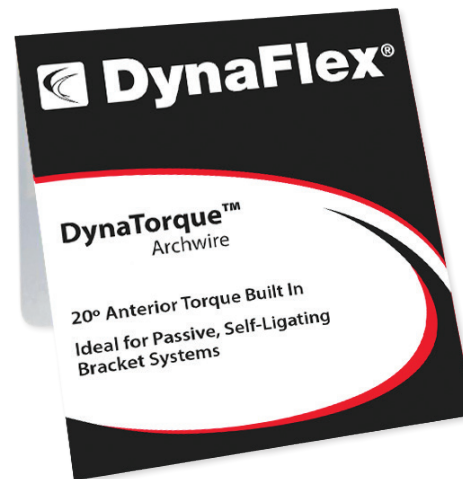

DynaTorque™ is a full-sized NiTi archwires with the anterior section pre-torqued to 20°. This specialized, preformed wire allows for the addition of torque into the anterior region while maintaining non-torque in the posterior region.

- Provides 20° anterior torque without bending.
- Early introduction of torque in upper centrals and laterals.
- Provides uprighting torque in the lower anterior segment.
- Labial or lingual torque forces by reversing wire orientation.
- Ideal for passive, self-ligating bracket systems.
- Pack of 10.

HOLLYWOOD Archwire

Developed By:
Dr. Michael Williams, DDS

Creating Beautiful, Perfect Smiles

Why choose the Hollywood Archwire?

Written by Dr. Michael Williams

Hollywood Arches have been designed to develop the bicuspid area and to deliver bicuspid prominence, creating a beautiful Hollywood smile! These archwires have the broadest archform transversely in the bicuspid area. What does this archform deliver? It eliminates the triangular dark corridors in your patient's smile.

Originally designed for use with the Series 2000 appliances and for those doctors looking to get fuller expression from self-ligating bracket systems. When using these archwire after the Series 2000 appliances, you will notice these archwires will maintain the dimension gained by the appliances and allow you to develop the dental and facial aesthetics to a whole new level!

Recent modifications extended the length of archwire allowing helical and other types of closed loop configurations to be made easily. The additional archwire length also allows for the wire to reach into the second molar bracket with cinch back activation.

DynaFlex® Copper Niti With Stops: For Self-Ligating Brackets

- Excellent springback provides fast and efficient tooth movement
- Easy engagement in slot due to smaller loading forces than standard Nickel Titanium
- Even at small deflections still provides continuous force
- Resistant to permanent deformation
- Precise temperature range means predictable results
- Very easy to engage
- Pack of 10

DynaFlex® Pre-Stopped Nickel Titanium Archwire: Pre-Installed Tube Stops

Two crimpable tube stops are pre-loaded and lightly crimped on archwires to provide the clinician with easy positioning along the arch. With only a light crimp, the tube stops are secured in place.

- Tube stops help to control wire movement along the arch.
- Convenient alternate to cinching
- Two bright, fully annealed 304SS 2mm long stops pre-crimped per archwire
- Small tubes (ID of .019") are pre-installed on round wires.
- Large tubes (ID of .031") are pre-installed on square and rectangle wires
- Pack of 10

DynaFlex® Stainless Steel: Keyhole Looped Archwire

Available in 2 and 4 loop options, these archwires will ensure accurate placement every time. Made from medical grade 304V stainless steel these wires feature bright, smooth, flat surfaces. The consistent shape will ensure your patients of great results every time. Used in sliding mechanics for extraction space closure and also in non-extraction Class II cases. Commonly used in combination with elastics or closed coil springs. Biocompatible, able to place and hold intricate bends, consistent force, and superior tensile strength. Packs of 10.

DynaFlex® Stainless Steel Archwire - Bulk Pack Gold Tone

We've spared no time or expense in the development of our high quality stainless steel archwires. Using the latest manufacturing technology and the highest grade stainless steel wire available enables us to offer you a consistent quality product at a very competitive price. As with all our products, our stainless steel archwires are manufactured under the strictest quality standards and FDA guidelines.

- Guaranteed less than 3° torque on square and rectangular wires
- Super high-luster polish for reduced friction
- Made from high quality spring temper 304V stainless steel
- Midline marked with permanent etch centermark for complete patient protection

Natural Form

Wider in the anterior region and reduces the need for time-consuming arch form adjustments.

DynaFlex® Crimpable Mini Stops

Keep archwires from sliding past any desired point with our new Crimpable Mini Stops. Mini Stops can be easily placed anywhere on the archwire. Due to their small size, they are extremely comfortable for patients. Low profile, which makes them aesthetically pleasing. Available in two sizes. Pack of 25.

#2019 Small .019
#2021 Large .030

DynaFlex® Crimpable Ball Hooks

These Crimpable Ball Hooks are easy to crimp onto the archwire, inside or outside the mouth. Creates a strong, non-sliding lock with the archwire and remains in place. Ball hook portion can be bent to allow for different treatment procedures. Fits round or rectangular wire up to size 018x025. Pack of 20.

#2018

DynaFlex® MIM Crimpable Stop

Sleek, smooth and easy to place. Our new MIM crimpable stop can be placed anywhere on an archwire to limit tooth movement or maintain position. Fits round wire or rectangular wires up to .021 x .025. Pack of 10.

#2030

DynaFlex® Direct Bond Eyelet

Our nickel-free direct bond eyelet is easily bonded on the buccal or lingual of any tooth. Base allows for superior bond strength. Pack of 10.

#2016

DynaFlex® Crimpable Stops

Easy to use. Simply place on archwire to limit tooth movement and maintain position. Fits round and rectangular wires up to .021x.025. Pack of 10.

#2020

DynaFlex® Crimpable Ball Hooks - Curved

A great alternative to posted archwires. Easily placed on all wire sizes up to .021x.025. Slotted base is .022 allowing for easy placement on the wire, either in or out of the mouth. Curved hooks aid in the application of elastics and extension springs. Pack of 10.

#2018-R Right Curved Hook

#2018-L Left Curved Hook

DynaFlex® Stop Locks & Wrench

Stop Locks continue to be a secure technique for archwire locking. The Stop Lock base is a .022 slot which slides easily over the archwire and is held firmly by the nut. Can help prevent the archwire from sliding out of the buccal tube or can be used for compression spring treatment. Pack of 5.

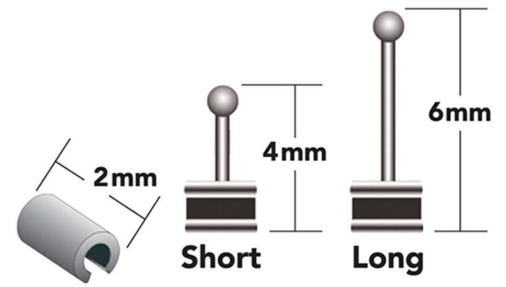

#2022 Stop Locks

#2022-W Stop Lock Wrench (sterilizable)

DynaFlex® Crimpable Stops: Non-Slip Design

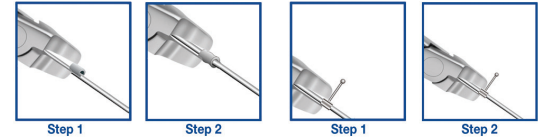

Our patent-pending, non-slip design is about to change what you think about crimpable archwire stops. Once crimped, our Non-Slip Stops remain securely in place due to the patent-pending, treated surface! Crimpable split archwire stops are designed to work with any type or size of wire, from nickel titanium to stainless steel, .012" to .021" x .025". No longer will you have to maintain an inventory of several different size stops or waste valuable chair time deciding what size to use. Our non-slip stops are your solution to every situation when a crimpable stop is needed.

#O-160-1065 Etched Crimpable Stops Pack of 100

Dead Soft Wire For Bonded Lingual Retainers

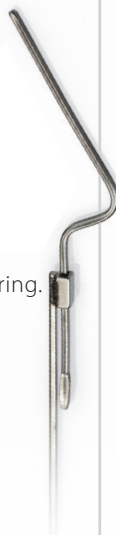

DynaFlex® Molar Uprighting Springs

The new Molar Uprighting Spring is a tremendous solution to a common problem. By using a newly developed super elastic spring you can upright molars extremely effectively. You will also be able to intrude molars depending on the individual patient needs. Pack of 10.

Follow these simple steps for molar uprighting:

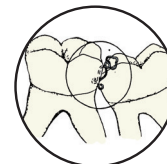

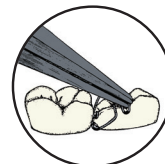

1. Place crosstube on archwire.
2. Make a bend in the steel section of the uprighting spring.
3. Place NITI part of uprighting spring into buccal tube.
4. Place steel part of uprighting spring into crosstube.
5. The light forces applied to the molars will allow the molar to upright in a consistent manner.

#101-1010

DynaFlex® De-Impactor Springs

An adjustable separating spring that uprights and erupts impacted molars and bicuspid in 4-6 weeks! Step-by-step illustrated instructions included. Regular or short size. Pack of 12.

DynaFlex® Nickel Titanium Distalizing Spring

A new revolutionary coil spring which allows you to effectively distalize molars without headgear or lip bumpers. Optimum patient comfort. Produces 150 grams of continuous force when compressed. Cut spring in middle of the closed coils. Each pack contains three 7" pieces. 010 x 045.

#0972

DynaFlex® Bondable Lingual Retainers Starter Kit

Starter Kit Contains: 1 case with 20 cuspid to cuspid bondable retainers: 4 of each size.

#O-953-3032 Starter Kit

DynaFlex® Direct Bond Lingual Cleat

Single unit cast construction allows for superior bond strength. Low-profile design. Smoothness of ball hooks allows for many uses in orthodontic treatment. Pack of 20.

#2015

DynaFlex® Micro Direct Bond Round Lingual Button

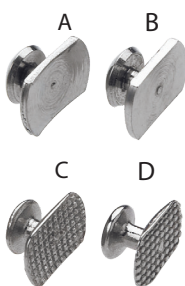

These very small low-profile micro buttons ensure patient comfort while still allowing room for tying elastics. Contoured mesh base allows for easy bonding. Pack of 10.

#2017

DynaFlex® Lingual Buttons

Weldable buttons are single-unit cast construction which minimizes patient discomfort. Our new bondable buttons are newly designed and constructed in one piece MIM design for enhanced strength and a flatter profile. Single piece construction provides the ultimate in strength. The rounded edges and corners provide the ultimate in patient comfort. Pack of 10.

Bondable

DynaFlex® Polycarbonate Buttons

The small size of these low profile buttons allows bonding in hard to reach areas. Pack of 10.

#O-600-1115

DynaFlex® Eruption Chain

Impacted teeth are erupted easily with our new chain system! Simple and easy to use. 10 buttons with chains attached per package. Manufactured from Stainless Steel, contains a small percentage of Nickel.

#2007

Jevan Thumb

Jevan Hand Instruments

Use the Jevan Thumb to hold the lingual wire in position.

Use the Hand Instrument to adapt and hold the lingual wire while bonding.

Lingual retainer is tightly adapted & placed at proper vertical height.

DynaFlex® Jevan System

Place Lingual Bonded Retainers Effortlessly

System Contains: One Jevan Thumb Forcep, Two Jevan Hand Instruments (one maxillary, one mandibular)

- The Jevan Thumb allows easy and precise placement of the lingual wire.
- The Jevan Hand Instrument is used to tightly adapt the wire to the lingual tooth surface.
- The offset tip allows easy & accurate control of the lingual wire.

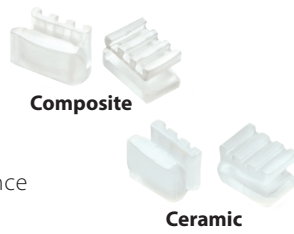

#O-224-3100

DynaFlex® Bondable Buttons

- Durable & stain-resistant
- Secure dovetail base design
- Aesthetically pleasing appearance
- Pack of 10

#O-600-1113 Composite

#O-600-1114 Ceramic

DynaFlex® Multi Lingual Button

Super clear with a super strong bond strength. Patented base created with a central groove and numerous holes which provide maximum bonding strength. Each button has a hole in the neck allowing for .012 to .018 wires to be inserted. Smooth, large dome head makes for ease in bonding and holding auxiliary elastics. Pack of 10.

#2008 Round Base

#2008-05 Rectangular Base

DynaFlex® Coated Koby Ties

Superior quality Teflon® coated Koby ties in toothtone. Available in pre-twisted in .012 short ties. Pack of 100.

Mini-Mold

DynaFlex® Mini Molds Starter Kit

Mini Mold Starter Kit makes it simple to create your own resin attachments! Each kit contains 3 of each Mini Mold type: Wire Bonders (large and small), Button Bonders, Bite Ramps (3mm and 5mm), Cupid Bite Ramps, Molar Pad Bonder, Habit Control Spikes, Bracket Bonders and Tube Bonders and 2 Handles.

#2045 Mini Mold Kit

#1786 Handles

DynaFlex® Universal Bite Opening Kit

The universal bite opening kit creates various bite opening attachments in seconds. Kit includes 4 each: 4 each of child & adult cuspid bite ramp mini molds, 3mm bite ramp mini molds, 5mm bite ramp mini molds, molar pad mini molds and 2 bonder handles.

#2046

DynaFlex® Peg Lateral Kit

A fast and easy way to convert a peg or undersized lateral to full size lateral. Kit of 4 sizes 2 per size:

7mmUL, 7mmUR, 8mmUL and 8mmUR

#O-152-1028

DynaFlex® Mini-Mold Adhesive Paste

Specially formulated to reduce curing time. Superior bonding strength. Smooth, tacky viscosity. Can be used with any light cure sealant. Available in blue or toothtone. 5 gram syringe.

#2045-10 Blue Mini-Mold Paste

#2045-20 Toothtone Mini-Mold Paste

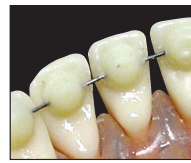

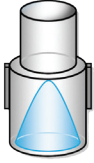

DynaFlex® Habit Control Bonder

Correct thumb sucking and tongue thrusting w/ minimal chair time.

(10 per pack + handle)

#2045-06

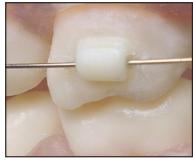

DynaFlex® Wire Bonder

Forms a precise spherical resin mound over an archwire, available in large or small.

(10 pack + handle)

#2045-04 Large \$75.50/pk.

#2045-04S Small

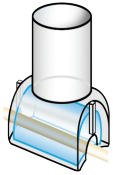

DynaFlex® Tube Bonder

Forms a temporary tube for easy placement on erupting molars.

(10 per pack + handle)

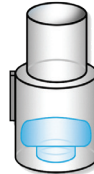

#2045-01

DynaFlex® Button Bonder

Forms a lingual button that can be placed on any tooth. (10 per pack + handle)

#2045-07

Light Cure Your Own Resin Attachments!

DynaFlex® Hook Molds

Quickly creates a small one-sided hook that is easy to place on the labial or lingual of a tooth for easy placement of elastics. (10 per pack + handle)

#2045-09

DynaFlex® Bracket Bonder

Forms a single wing bracket for simple tooth correction. (10 per pack + handle)

#2045-02

DynaFlex® Cuspid Bite Ramp

Ideal for immediate bite opening when the overjet is in excess of 5mm. Available in adult or Pedito size. (8 per pack + handle)

#2045-25 Cuspid Bite Ramp

#2045-25P Pedito Bite Ramp

DynaFlex® Bite-Ramp Bonder

Forms a bite-opening ramp on the lingual of upper incisors.

(8 per pack + handle)

#2045-03 3mm

#2045-08 5mm

DynaFlex® Molar Pad

Forms a precise spherical mound on the posterior cusps, compliments the anterior bite-ramp for opening the bite from the posterior teeth. (10 per pack + handle)

#2045-05

Mini Molds are ideal for aesthetic attachments. A great solution for sensitive patients. Simply choose from the 6 mold types, fill the mold with light cure resin, and place the mold on the desired tooth and light cure. Fluoride releasing. Available in a kit of 24 (3 of each style) or individual style packages of 10. Bite-Ramp Bonder packaged 8 per pack

ELASTOMERICS

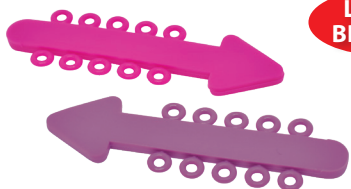

Latex & BPA FREE

DynaFlex® Dyna Stick Ligature Ties

Now, shinier than ever! All of our elastomeric ties are manufactured using the newest materials and latest technology. Our ties now feature a shiny finish that deepens the color while still maintaining the 3/8" stretch and 90% rebound. Superior strength, bright colors, guaranteed not to fade or discolor. 29 attractive colors available! 50 ties per stick - 20 sticks per pack. 1000 Total Ties!

All colors shown in chart on opposite page.

Latex & BPA FREE

DynaFlex® Single Stick Ligature Ties

The same as our Dyna Stick Ligature Ties, but in a smaller stick. Superior strength, bright colors, guaranteed not to fade or discolor. 29 attractive colors available! 10 ties per stick - 100 sticks per pack. 1000 Total Ties!

All colors shown in chart on opposite page.

DynaFlex® Power Chain

Super strong and powerful! DynaFlex Power Chain maintains excellent rebound for extended periods of time, giving you the force you need. We unconditionally guarantee our chain to be of the highest quality available. All the power chain colors match tie colors. 15-foot spool.

Elastomeric Organizers

DynaFlex® Power Chain Organizer w/ Guide Holes

Holds up to 18 spools.

#1494-20

DynaFlex® Power Chain Organizer w/Cover

Strong and sturdy design. Hinged cover for protection. Holds 18 spools of power chain.

#1494

DynaFlex® Power Chain Dispenser

Clear acrylic design easily dispenses chain. Holds up to 12 spools.

#1494-01

DynaStick & Chain Organizer w/Cover

Our custom-built organizer which holds our Dyna Sticks. A great way to view the colors. Twelve tubes to hold Dyna Sticks and a bar to hold 12 power chains.

#1491

DynaStick Organizer

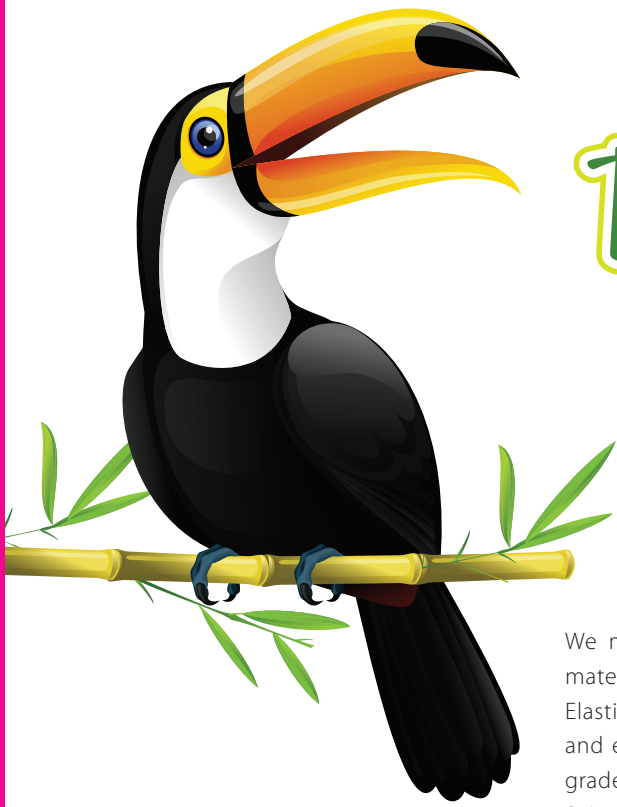

Holds 12 colors of DynaSticks with clear acrylic lid.

#1491-05

Rainforest[™] Elastics

Available in Latex and Latex Free

We manufacture our latex Rainforest Elastics using prime, medical grade raw material that far exceeds industry quality standards for intraoral use. Rainforest Elastics are perfectly formed and accurately cut to ensure consistent force levels and efficient treatment. Our non-latex elastics are manufactured from a medical grade resin, eliminating any concerns of latex allergies. Both of our Non-Latex & Latex versions of Rainforest Elastics do not absorb water or saliva. Each box contains 50 patient bags of 100 elastics, totaling 5,000 elastics per box.

FEATURES

- Non-latex performs like latex elastics
- Manufactured from a medical grade resin
- Does not absorb water or saliva
- Eliminates the use of heavy talc
- Offers consistent force levels
- Each box contains 50 packs of 100 elastics each

Only prime medical grade latex meets our standards for manufacturing our Rainforest intraoral elastics.

#18-LLUBLBP	Leur Lok Ultra Band-Lok, Blue, in Push Syringe, 5gm
#18-LLTIPS	Leur Lok Tips, 60pk

Band-Lok® Glass Ionomer Dual Cure Cement

Band-Lok® is a Dual Cure, Fluoride releasing, two paste cement. It can be used with or without a dental curing light. When band is placed and flash is cleaned a 20 second light activation allows full protection from moisture. Without light activation a complete set is achieved in 10 minutes. Four minute working time at room temperature without a frozen slab. No messy Powder-Liquid Systems. Consistent mix viscosity every time. Unlike Glass Monomer cements, Band-Lok does not have an aftertaste or odor.

ITEM #	DESCRIPTION
#18-BLSA	Part A Band-Lok Paste, Screw Syringe, 6gm
#18-BLSAB	Part A Band-Lok Paste, Blue Screw Syringe, 6gm
#18-BLSB	Part B Band-Lok Paste, Screw Syringe, 6gm

Reliance® Pad Lock Light Cure Adhesive

Fluorescing Light Cure Adhesive that increases adhesion to even the finest mesh pad bracket bases! Pad Lock contains a monomer that bonds chemically to metal. The paste will fluoresce when illuminated with a black light which allows the operator to disclose flash not removed initially as well as adhesive remnants left after debonding.

ITEM #	DESCRIPTION
#18-PLP	PadLock LC Push Syringe 4.5 gram
#18-PLPF	PadLock LC Push Syringe w/ Fluoride 4.5 gram
#18-PLT	PadLock LC Paste in Tips 4.5 gram - 10 pk
#18-PLTF	PadLock LC Paste in Tips w/Fluoride 4.5 gm - 10 pk
#18-CRII	C.R. Syringe Mark II
#18-AS	Assure Sealant - 6cc

GoTo Light Cure Bracket Adhesive

Formulated with a high filler content, GoTo paste does not allow for bracket flotation once placed on the tooth or as flash is being removed. This filler construction makes for single piece flash removal by being able to remove a single piece without breaking.

#18-GTP Syringe, 4 gram

#18-GTT Syringe Tips, (10) 4 gram tips

FlowTain™

FlowTain™ is a light cured composite with a low modulus of elasticity, which makes it great for lingual retainers, splinting materials, and indirect bonding of brackets. FlowTain™ is also a highly polishable material, which reduces wear. Sold individually with 10 tips.

#1888 Syringe w/tips - Toothtone

#18-22TIPS10 22 Gauge Tips 10pk

Reliance®

Excel Regular Herbst Screw Syringe Kit w/ Fluoride

Unsurpassed bond strength, thin consistency, extended working time. Formulated with a patented fluoride releasing monomer that will not reduce bond strength. Kit contains: 2 Excel Part A 6gm Syringes, 2 Excel Part B 6gm Syringes, 7g Bonding Agent Part A and B, 10cc Plastic Conditioner, 9g Liquid Etch.

#18-EHSF

Self Mix Crown Lok Blue

Metal crown luting cement that bonds chemically stainless steel. Two minute working time. Dual syringe self mixes. Contains fluoride and is blue in color. Each package contains one 5gm syringe and 15 self mixing tips.

#18-SMCLB

Glass Lok Economy Kit-Natural Shade

Dual core Glass Ionomer band cement. Hydrophilic Powder/Liquid Cement for secure band adhesion, bonds in a wet or dry field. Resists washout from under bands. Contains fluoride to protect enamel. Bonds chemically to metal. Dual core or light cure. Kit contains: 3 25gm Glass Lok, 1 100g Glas Lok Powder.

#18-GLE

Retainium

Original TM Alloy Retainer Wire, Lingual Titanium Molybdenum Retention for Fixed Lingual Retention. Flexes interproximally, Nickel free, Lowest profile, .027" x .011" ribbon arch, low profile and Nickel free. 10 6" wires per package.

#1800-RET

Retainium XL

Optimum strength Bet Titanium Retainer Wire for Fixed Lingual Retention, Diastema maintenance, space maintenance and splinting. Flat .027" x .016" ribbon arch, low profile and nickel free. 10 6" wires per package.

#1800-RETXL

Reliance®

Bonding Products

Consistent Quality You Can Count On

1st & Final Prophy Pumice

200 sterile cups for individual patients use. Pre-mixed – no messy mixing with water. Just open & apply with prophy cup. Tests show that 1st & Final® will pumice more effectively & rinse cleaner for increased bond strength. No flavoring, fluorides or oils which could leave a film that may inhibit or weaken the bond.

#18-FF

L.C.R. - Light Cure Retainer Paste

ITEM #	DESCRIPTION
#18-LCR	LCR Push Syringe, 5gm
#18-LCRT5	LCR Preloaded Tips, 11pk

L.C.R. - Light Cure Retainer Kit

Light Cure Retainer Kit with a smooth viscosity. Micro+ nano fill for flowable consistency with durability of highly filled composite. Kit contains 4 5g Light Cure Retainer Push Syringes, 2 3CC Light Bond Regular with fluoride, 1 23g liquid etchant.

#18-LCREP

Sponge Pellets by Reliance®

500 pellets per pack.

#18-SP

Ortho Stainless Steel Flextech®

30% Stronger Tensile Strength than Gold OrthoFlex-Tech and 300% increased Torsional Strength over Gold OrthoFlex-Tech. 30 inch spool.

#18-SSOFT

Bond-A-Braid Lingual Retainer Wire

The dead soft wire easily adapts and is excellent for semi-permanent orthodontic splinting of the upper and lower incisors, diastema maintenance and other tooth splinting. .027" x .011: ribbon arch wire, 8-strand braided wire, dead soft, adapts easily. Each tube contains 10 6" wires.

#18-BAB2

Reliance® S.E.P

In this age in which we consolidate as many steps as we can in accomplishing a task, it seems only logical that the next step in bonding is to try to consolidate the etch, rinse, and sealant process into one step. This would be time- as well as cost-effective. This is exactly what you get with our new S.E.P (Self-Etching Primer) Kit. This product consists of two components: an acid etch and a monomer primer. After mixing the two components together this system requires you to rub the material into the tooth for 5 seconds, then deliver two bursts of air to drive off the excess etchant and dry the primer. The bracket can then be placed. Also required is the use of a light-cured adhesive paste system. *Compares to Transbond.

ITEM #	DESCRIPTION
#18-SEPD	SEP Dispenser
#18-SEPR	SEP Refill Cartridge, 4ml
#18-1SEPW	SEP Mixing Well - 1 per pack

*Transbond is a registered trademark of 3M Unitek.

Bond Aligner

Light Cure Aligner Adhesive, secure aesthetic bonds, bond to any clear aligner material. No primers or conditioners required. High modulus of elasticity, bonds ceramic, metal or plastic attachments. 1.4gm syringe with 5 tips.

#18-BA Bond Aligner Syringe (1.4gm)

#18-22TIPS10 22 Gauge Tips (10)

Economy Etchant by Reliance®

Reliance etchant in the economical package saves you money!

ITEM #	DESCRIPTION
#18-EGSS	Green Etch Syringe, 6.5gm
#18-22TIPS10	22-gauge Metal Tips, 10pk.
#18-EL9	Liquid Etch, 9gm
#18-EL24	Liquid Etch, 23gm
#18-EL24C	Liquid Etch, Cherry, 23gm

37% phosphoric acid

Ortho Flextech®

Ortho Flextech® is the next generation of lingual retention. Ortho Flextech® stabilizes orthodontic corrections and prevents rotational relapses. It also improves patient comfort because it lays flat against the teeth. Requires less chair time, and has lasting esthetic due to the 14 karat gold composition. Available only in 30" spools.

Reliance® L.E.D. Pro Seal

LED Pro-Seal a light-cured, fluoride-releasing, filled sealant with a proprietary catalyst. This catalyst allows for the complete polymerization of the Pro-Seal without an oxygen-inhibited layer, and consequently no porosity. L.E.D. Pro-Seal is intended to seal the enamel surface around the base of the brackets. In essence, it is placing a clear plastic protective layer on the enamel surface that will not break down in the presence of oral fluids, abrasive foods, or carbonated beverages. 6ml bottle. *Compares to Ortho Solo.

*Can be used with
any LED light*

#18-LEDPRO

Assure® Plus

An all surface bonding resin! Now it is possible to bond to every intraoral surface with just one primer! No need to stock multiple surface special bonding conditioners. Assure™ Plus allows you to bond directly to normal, atypical, wet or dry enamel, dentin and defective enamel, gold, amalgam, stainless steel and composite, restorations, porcelain and zirconia. Assure™ Plus is compatible with all light and chemical cure pastes.

#18-PLUS

Porc-Etch

Porcelain etch with 7cc Barrier Gel allows for prep to use bonding adhesives with glazed porcelain crowns.

#18-1POE

Plastic Conditioner

The Reliance Plastic Appliance Conditioner is intended for use as a conditioner of plastic brackets or acrylic appliances in preparation for bonding with any adhesive, sealant or cement. It can also be used to condition a composite restoration or acrylic jacket prior to bonding and to rebond a bracket impregnated with adhesive. 10cc.

#18-PL

Metal Primer

Metal primer is used to prepare metal surfaces for use with a bonding adhesive. 8ml.

#18-ME

Porcelain Conditioner

Porcelain Conditioner is used to prepare glazed porcelain for use with a bonding adhesive. 8cc.

#18-PO

Pro Seal

Pro Seal is the first sealant, chemical or light cure, that will completely set without an oxygen inhibited layer. This creates a smooth hard surface that prevents leakage, protects the enamel, and makes paste cleanup easier. 6ml.

#18-PRO

Renew Finishing Points

The Renew Finishing System Points #383 will remove small residual amounts of adhesive from the tooth surface and will polish the enamel without damage. It's rubberized tapered shape facilitates removal of adhesive close to the gingiva. The #383 Point is the second step in the Renew Finishing System Points. Each pack contains 12 points.

A. **#18-RSPFG**

B. **#18-RSPHP**

Renew System Burs #218

The #218 bur is an 18 fluted design that is tapered to reach into those tight areas along the gingival & occlusal when removing residual adhesive. The wide flutes self clean. These burs are the first step in the RENEW™ FINISHING SYSTEM. Sold Individually.

#18-RSB2

Finishing Bur

Our high quality Carbide Finishing Burs allow you to remove cement without damage to the enamel. They trim more predictably and smoothly, and are less pressure sensitive. Because our finishing burs remove bulk and leave you with a smooth surface finish, they are the perfect choice for finishing your debonding appointments with ease. 5 per pack.

#1804

Renew Finishing Bur Straight Handpiece

The #815 lingual composite bur with its friction grip, custom length and cutting head, make this the ideal carbide bur for lingual composite removal. These burs are the first step in the RENEW™ FINISHING SYSTEM Sold Individually.

#1800-RSB815

Renew System Bur

The Renew System Bur has a longer shank for excellent adhesive removal. It's non-tapered friction grip bur cuts quickly and wide flute is self-cleaning. Sold individually.

#18-RSB 118S

MI Paste® and MI Paste Plus™

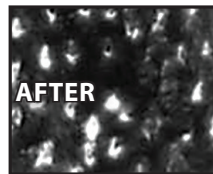

MI Paste and MI Paste Plus contain RECALDENT™. RECALDENT™ is a special milk-derived protein that can help replace lost minerals in teeth, making them stronger and helps protect them from decay and erosion. A one-of-a-kind take-home dental product!

- #9-004505 MI Paste (10 Tubes Of Strawberry Only)
- #9-003679 MI Paste (10 Tubes Of Mint Only)
- #9-002886 MI Paste Plus (10 Tubes Of Strawberry Only)
- #9-002888 MI Paste Plus (10 Tubes Of Vanilla Only)
- #9-002265 MI Paste® (10 Tubes)
- #9-002614 MI Paste Plus™ (10 Tubes Of Assorted Flavors)
- #9-002621 MI Paste Plus™ (10 Tubes Of Mint Only)

MI Paste®:

- Before and after tooth whitening
- For pregnant women
- For children under 6
- During and/or after orthodontics
- For desensitizing
- To provide extra protection for teeth

MI Paste Plus™:

- Extra protection for the teeth
- After tooth whitening
- For desensitizing
- During and/or after orthodontics
- For medically compromised patients
- For Salivary deficiency; dry mouth
- For patients with acidic oral environments
- For erosion and gastric reflex
- For patients with poor plaque control
- For high-carries risk patients

GC Fuji® Ortho™ Band Paste Pack Self-Cure

GC Fuji ORTHO BAND is a blue-colored resin modified glass ionomer band cement. The dispenser system has a metering slide that allows for consistent mixes every time. Simply adjust the slide and squeeze out the exact amount needed. Mix dispensed paste for 20 seconds, you'll have a 3-1/2 minute working time and final set will be 3 minutes after. Blue color allows for easy clean up and removal.

- #9-439460 Paste Pack Starter Package
- #9-001888 Band Paste Pack Refill (2-13.3gm paste pack cartridges)
- #9-001573 Paste Pack Dispenser

Fuji LC Automix

GC Fuji Ortho LC is a dual cured resin reinforced glass ionomer cement that is now available in an easy to use automix paste pack. Releases fluoride long term which aids in the prevention of white spot lesions. The accompanying GC Fuji Ortho Gel Conditioner is a polyacrylic gel solution (approximately 20%) designed to mildly condition the enamel. Conditioner is available in a syringe delivery system with brush tips for easy application.

#9-439487 LC Paste Pack Automix Starter Set Contains: 1 Paste Pack Cartridge (13.5 gms), 1 Paste Pack Dispenser, 2 Ortho Gel Conditioner Syringes (1.4 gms each), 20 Mixing Tips and 15 Brush Tips

#9-003103 LC Automix Refill Contains: 2 Paste Pack Cartridges (13.5 gms each)

#9-003102 LC Paste Pack Automix Set Contains: 1 Paste Pack Cartridge (13.5 gms), 2 Ortho Gel Conditioner Syringes (1.4 gms each), 20 Mixing Tips and 15 Brush Tips

#9-003104 Gel Conditioner

#9-423008 Mixing Tips for LC Refill (20 mixing tips)

GC Fuji Ortho Band LC Automix

GC Fuji Ortho LC and GC Fuji Ortho Band LC are dual cured resin reinforced glass ionomer cements that are now available in easy-to-use automix paste packs. Both release fluoride long term, which aids in the prevention of white spot lesions. The accompanying GC Fuji Ortho Gel Conditioner is a polyacrylic acid gel solution (approximately 20%) designed to mildly condition enamel. Conditioner is available in syringe delivery with brush tips for easy application.

#9-439466 GC Fuji Ortho Band LC Paste Pack Starter Kit Contains:

2 Paste Pack Cartridges (13.3 grams each), 1 Paste Pack Dispenser, 20 Mixing Tips and 1 Mixing Pad

#9-003105 GC Fuji Ortho Band LC Paste Pack Refill Contains:

2 Paste Pack Cartridges (13.3 grams each) and 1 Mixing Pad

#9-423008 GC Mixing Tips for LC Refill (20 mixing tips)

GC Fuji Ortho™ Self-Cured Bonding Adhesive

Just like Fuji ORTHO LC, Fuji ORTHO SC will provide you with excellent bonding success and minimizes the chance of enamel damage and decalcification at debonding.

Excellent for bonding brackets
& acrylic appliances!

#9-439503 Fuji ORTHO SC Standard Package (40gm powder, 2-6.8ml liquid)

#9-000210 Fuji ORTHO SC Liquid Refill (6.8ml)

#9-000209 Fuji ORTHO SC Powder Refill (40gms)

Bonds in a wet field
without etching!

GC Fuji ORTHO™ LC

Fuji ORTHO LC is a light-cured resin modified glass ionomer that bonds bracket, attachments and appliances to enamel, porcelain and metal restorations. Fuji ORTHO LC features low sensitivity to moisture. Available in both powder-liquid and capsules.

- Simplified wet field bonding saves time!
- No enamel etching required
- Significant Fluoride Release reduces decalcification
- Greater Efficiency--users experience 15-30 minute time savings per case start

Champion™ Pre-Mixed Prophy Pumice

A special formulation that has no effect on bond strength. Our pre-mixed pumice does not contain any fluoride, oils, flavoring and will not splatter. Package of 200 pre-mixed cups and one finger holder per box.

#4401-05

First Step: Pre-Mixed Prophy Paste In Cups (Fluoride Free)

Premixed prophylaxis paste in convenient single unit cups. Clean teeth prior to acid etching or crown cementation without leaving residue. No Fluoride so there's no effect on bond strength. No flavoring agents, splatter, oils or waste. Each box contains 200 Cups and 1 Holder. Box of 200.

- No Fluoride
- No Splatter
- No Flavoring Agents or Oils
- No Waste
- No Effect on Bond Strength

#O-108-1000

Ketac-Cem®

Ketac-Cem® adheres to both tooth structure and metal oxides with no conditioning for an easier technique than hybrid cements.

- Radiopaque
- Low coefficient of thermal expansion
- High fluoride release
- Ideal setting characteristics
- Stability
- Exceptional adhesion

Ketac Triple Kit

Three 33g bottles of powder & three 12ml bottles of liquid

Etch-Rite™: Etching Gel 38% Phosphoric Acid

Etch-Rite is a superior quality dental etching gel specially formulated or maximum working and handling characteristics.

- #1 seller through dental dealers in the U.S.
- Washes off easily, stays where placed

#O-115-1157 Kit Includes: 4x1.2ml syringes + 8 pre-bent tips

#O-115-1158 Bulk Pack Includes: 24 x 1.2ml syringes gel

Champion™ Etch Gel

Available in regular or mint flavor. Contains 37% Phosphoric acid. Allow etch to penetrate tooth surface for 30 seconds. Available in 2 ounce bottle or 12 gram syringe.

- #1798 2 oz. Bottle - Regular
- #1799 2 oz. Bottle - Mint
- #1820 12 Gram Syringe
- #1821 Disposable Tips - Bag of 50

Blue Etch: Silica-Free Enamel Etch

Silica-Free easy rinse formula. Viscous etch in bottles is slightly thinner than a gel but thicker than water. 37% phosphoric acid.

Viscous Etch In Bottles

- #O-115-1040 2 oz. bottle
- #O-115-1042 8 oz. bottle
- #O-115-1044 12 oz. bottle

Gel Style Etch In Syringes

- #O-115-1046 12g syringe (with 25 disposable tips)
- #O-115-1048 60g syringe (w/five 5g refillable syringes & 20 tips)

Green Etch: Viscous Etch-Green

Green color contrasts with tissue. Viscous etch has a honey-like consistency, thinner than a gel, but thicker than water. 37% phosphoric acid.

Viscous Etch in Bottle

- #O-115-1032 8 oz. bottle
- #O-115-1034 12 oz. bottle

Gel Etch Syringes

- #O-115-1038 60g syringe (w/five 5g refillable syringes & 20 tips)

DynaFlex® Prophylaxis Polishing Cups

An economical screw-shank or snap-on type cup available to fit all prophy angles or prophy sticks. Each designed for maximum delivery of prophy paste to the tooth surface with minimal splatter. Each are a package of 144.

- #O-108-1012 Snap-on
- #O-108-1013 Screw-on

DynaFlex® Propphy Sticks Heat Sterilizable

- #O-108-1005 Snap On
- #O-108-1006 Screw On

DynaFlex® Mixing Pads

- Poly-Coated
- 100 sheets per pad
- Non-Skid Foam Base
- Package of 4

#O-115-1090 3" x 3" pads

#O-115-1092 3" x 6" pads

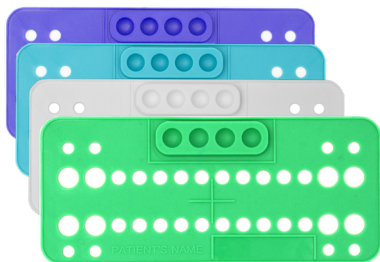

DynaFlex® Mixing Pads

Coated surface is great for mixing cements. 50 sheets per tablet; 5 tablets per package.

DynaFlex® Zand® Gauge - Perfect Bracketing Position Every Time

A unique and easy to use marking device to aid in correct bracket placement. After acid etching and conditioning with primer, anterior teeth are marked with the straight gauge. Posterior teeth are then marked with contra angle gauge as far back as the second molars. Then, simply line up the bracket slot with the mark on the tooth. Marks are easily removed by brushing the teeth. Each Zand Gauge Kit includes EIGHT gauges, 1-31/2mm, 3-4mm, 1-41/2mm, 3-5mm. Gauges are cold sterilizable. PATENTED # 5312248

#1322

DynaFlex® Microbrush® Disposable Applicators

Microbrush® Applicators have a patented design with a bendable neck that facilitates placement in hard-to-reach areas. Non-absorbent and non-linting fibers suspend solution as small as 1/8 of a drop. No dripping or spilling. Each package contains 4 tubes of 100 applicators each. Applicators are available in an assorted pack.

#1590-05 Multi-Colored Box

DynaFlex® Bonding Brushes

Our superiorly constructed 2" brush is now more economical than ever! Each pack contains 250 brushes.

#1783

DynaFlex® 6" Bendable Brushes

- Easy to bend, stays bent
- 6" for easy access to posterior areas
- Pack of 144

#O-125-1010

DynaFlex® 2" Bendable Bonding Brushes

Handle And Brush In One

Same great qualities as our regular Bonding Brushes but with a Bendable neck for easier access to hard to reach areas. Ideal for etchants, bonding agents, sealants, and adhesives and resins.

#O-125-1015 Box of 400

DynaFlex® 2 1/4 Bonding Brushes

Handle and Brush In One

Quality bristles allows for greater carrying capacity and spreading action. Ideal for..

- Etchants
- Sealants
- Bonding Agents
- Adhesives & Resins

#O-125-1016 Box of 400

DynaFlex® Mini Sponges

- Foam pellets measure: 1/8" x 1/8"
- Convenient poly dispenser
- 200 pellets

#O-125-1026

DynaFlex® Plastic Spatulas

White plastic spatulas are perfect for mixing cement. 4 1/2". Pack of 100.

#1886

DynaFlex® BOND LIGHT - L.E.D. Light Curing Wand

- State-of-the-art technology
- Super High Luminosity L.E.D. (1,000 - 1,200mW/cm²)
- High Quality light guide minimizes loss of light at tip
- Highly Efficient heat sink keeps things cool
- Operates cordless or plugged in
- Up to 200 Bonds per charge
- Timer Settings from 10 - 40 seconds (in 10 second intervals)
- 1 year warranty

DynaFlex® Disposable Curing Light Sleeve

Pack of 100

#O-190-6053

DynaFlex® Turbo Curing Light

- Built in radiometer
- Intensity up to 2,400 mW of power.
- Light wavelength between 440 and 480 nm.
- Cordless, lightweight
- Long-lasting rechargeable battery.
- Auto sleep mode to save battery life.
- 6 powerful extensive modes
- 3 sec. turbo mode.
- Advanced cooling system to protect from overheating and guarantees safe and flawless performance.

#WL090

DynaFlex® Turbo Curing Light PLUS

- Cures composites over 2mm in 2 sec. in turbo mode.
- High power 10W broadband LEDs
- Average lifespan of 100,000 hours
- Radiant intensity Up to 2400mW/cm²
- 8mm light rod
- Easy to change cartridge battery
- Multifunctional light allowing 2-second cure in "turbo" mode as the highest mode
- Considered to have two main functions: Light Curing and Plaque/Caries Detector
- 8mm and 5mm tip included

#WL090+

DynaFlex® Light Cure Glasses

Protects against halogen curing light exposure. Adjustable temples allow for varied protective angles, provides wraparound protection.

A. #0831 Skyper Orange

B. #0832 Orange Blockers

DynaFlex® Light Curing Glasses

Filters out 98% of dangerous blue light and 100% protection from UV light. Impact resistant. Non-distorting and optically correct.

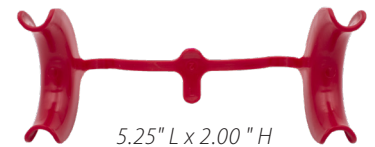

#0824-011

DynaFlex® Disposable Spandeez Retractor

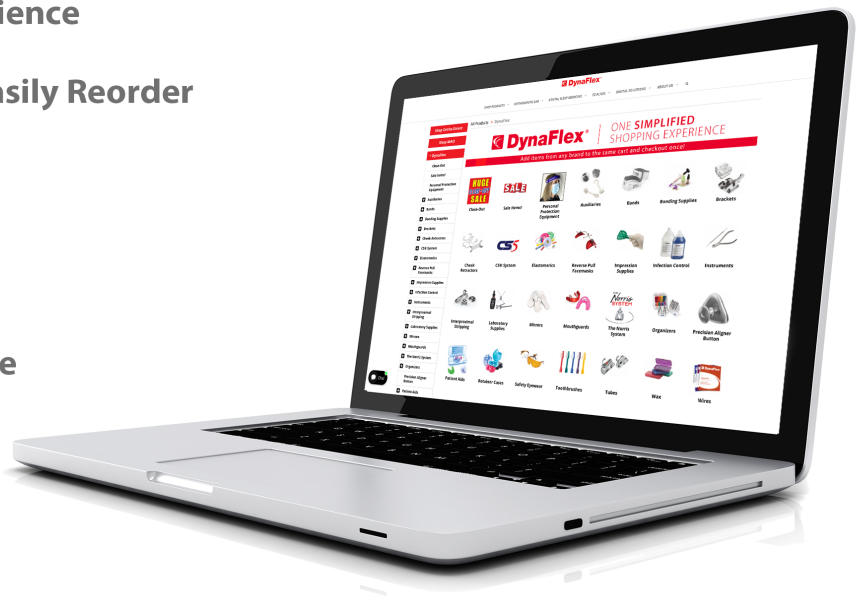

This retractor, similar in style to the well-known Expando is now available as disposable! Available in Medium (blue) and Large (red). Sizes are color-coded for easy identification. Pack of 10.

- #1358-S Small (green)
- #1358-M Medium (blue)
- #1358-L Large (red)

Norris "Double Take" Mirror

Designed by Dr. Robert "Tito" Norris, this Double-Sided, multi-functional intraoral mirror allows the doctor to simultaneously retract and visualize groups of teeth. This unique design is particularly helpful when bonding second molars or bonding groups of anterior or posterior teeth. Its unique shape allows broader visualization of multiple bracket positions in relation to each other. Made from Medical-Grade Stainless Steel, each mirror can be sterilized through dry-heat or autoclave.

INSTRUMENTS

OLYMPUS

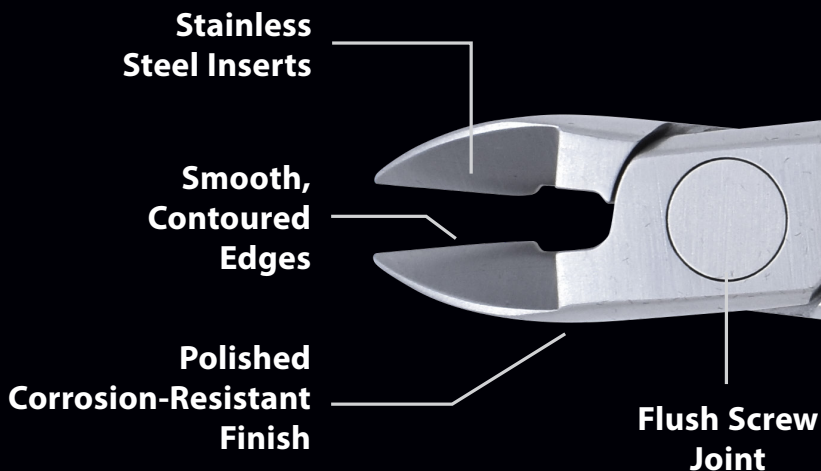

— INSTRUMENTS —

The Ultimate Orthodontic Instrument

DynaFlex® Olympus Pliers are made from the highest grade German Stainless-Steel bar stock available and hand formed to perfection. The finish is flawless and resists staining as well as corrosion. Our precision design incorporates a sliding lock that eliminates misaligned tips and a smooth, well-balanced fit. The exclusive Flush Screw Joint provides smooth action from day one without the risk of locking up or squeaking when used. The minute you hold one of these high-quality, perfectly formed instruments you will instantly feel and see an extremely well-made plier that will stand the test of time. As an added bonus, all of the inserts are made from super hard T-12 stainless steel that allows for very precise cuts that feel effortless and will not dull or fracture over time.

2 Year Warranty : Damage to instruments, due to normal everyday use, will be covered by DynaFlex® for one full year from the purchased date. After the 1 year period, DynaFlex® offers Renu Plier Repair Service, see page 154 for applicable fees.

Olympus Orthodontic Instrument Sterilization Instructions

Instrument Sterilization:

Inspect, clean, and sterilize before each use. Use steam sterilize for at least 4 minutes at 270°F/132°C or 30 minutes at 250°F/121°C. Do not use the high pressure steam sterilization with the medicine made of alcoholic content. Use recommended chemicals only. Hinged instruments must be cleaned and sterilized in the open position. Clean instruments thoroughly, rinse and dry before sterilizing. Remove instruments immediately when cycle is complete to avoid possible signs of corrosion or discoloration.

Ultrasonic Cleaning:

Ultrasonic cleaning of cutting pliers is not recommended, this can dull or damage cutters. If ultrasonic cleaning is chosen, follow equipment manufacturer's recommended immersion schedule. Rinse instruments with high volume water before sterilizing. Air and towel dry instruments before sterilizing.

Lubrication:

To increase life of instruments, regular lubrication is recommended.

Always lubricate after sterilization.

One drop or a light spray is sufficient. Wipe off excessive lubricant. Sticky Joints is most common problem occurs due to less lubrication.

Sharpening:

Regular sharpening of orthodontic cutting pliers increase its life and ability to cut efficiently. Frequency of sharpening depends on: the frequency of use, as well as, the types and diameters of wires on which the cutter is being used. Check cutters frequently to assess if sharpening is needed.

Corrosion or Discoloration:

Even orthodontic instruments are made with highest quality surgical grade stainless steel which protect instruments from rust, but care is key factor for long life of instruments and protection from rust or oxidation. You can prevent corrosion problems by properly following all manufacturers recommendations. Discoloration of instruments, brown or yellow stains is the major cause if instruments are not dry after sterilization, not well cleaned or not kept in dry place. Discoloration may appear that may not be corrosion and can be removed by scrubbing with light wool saturate. Keep instruments in protective and dry case when not in use. It is recommended that a corroded instrument be replaced or through away. Never mix a corroded instrument with new instruments as oxidation may be spread to new instruments.

#O-109-1300

Single-Sided: 7/8" dia. 0.10 mm thick

#O-109-1302

Double-Sided: 7/8" dia. 0.15 mm thick

DynaFlex® See Thru Diamond Disc

#O-109-1303

Double Sided: 7/8" dia. 0.18 mm thick.

Smooth Interproximal Stripping

DynaFlex® Serrated Diamond Disc

Enlarged To Show Detail

#O-109-1299

Double Sided: 7/8" dia. 0.20 mm thick.

Smooth Interproximal Stripping

DynaFlex® Interproximal Disc

A double sided diamond disc designed for separating and shaping the interproximal, marginal and facial surfaces of enamel or composite, acrylic and ceramic restorations. Discs are electro plated and riveted to maintain a long instrument life. Comes attached to mandrel. Honeycomb swirl allows for more tooth contact. Thickness of discs is 0.18mm. Sterilization recommendation: 30 min at 121 degrees C or for 4 minutes at 134 degrees C.

- #0778** Honeycomb 22mm
- #0778-01** Honeycomb 18mm
- #0778-02** Honeycomb 14mm

- #0779** Honeycomb Swirl 22mm
- #0779-01** Honeycomb Swirl 18mm

DynaFlex® Ortho Stripping Disc

A double sided disc used for smooth interproximal stripping. Extremely flexible and easy to use. For use with the low speed handpiece. Disc thickness is 0.14mm. Available in 22mm or 16mm diameter.

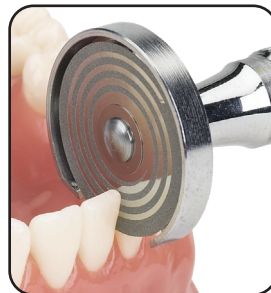

- #0760** 22mm Diameter
- #0760-01** 16mm Diameter

STERILIZATION RECOMMENDATION:
Rinse with water and dry, then steam sterilize at 121° C for 20 min or 134° C for 5 min.

DynaFlex® Disc Guard Set

Protects patient from stripping discs. Allows you to provide extra patient safety. Fits 7/8" discs. Kit includes shaft, 22mm guard, 16mm guard and 8mm guard.

#0761

DynaFlex® ContacEz® Thickness Gauge Set

Incremental thickness gauge made of stainless steel. Set of 6 guides, one each size: 0.10mm, 0.20mm, 0.25mm, 0.30mm, 0.40mm, .0.50mm.

#O-109-1525

DynaFlex® ContacEZ® IPR System

The ContacEZ IPR System is an innovative interproximal enamel reduction system that makes IPR safer and more accurate without cutting excessive enamel.

- Will not cut lips or gums and eliminates gagging
- Flexible strip does not create corners or subgingival ledges
- Single-handed design offers optimal tactile control
- Effective for anterior teeth, easy to access to posterior areas, and case refinement.

STERILIZATION RECOMMENDATION:

Do not heat sterilize.
Steam sterilization only, up to 270° F at 30 psi max.

DynaFlex® Alginate Flavoring Rack

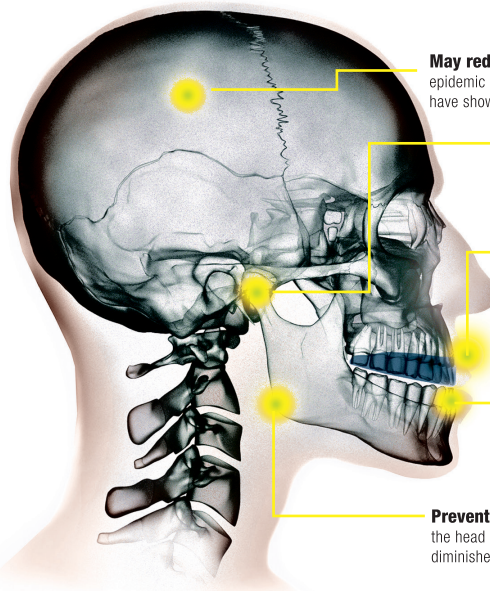

Our clear acrylic alginate flavoring organizer is a great way to move from chair to chair! Each rack holds 6 flavorings.

DynaFlex® Pro-form Mouthguards

DynaFlex® Lab Can Also Fabricate These For You.

Professional and amateur athletes alike use Pro-form mouthguards because they provide the highest level of protection, retention, comfort and fit without hindering speech, breathing and most of all athletic performance. The Pro-form custom-fit mouthguard goes above and beyond typical boil-and-bite mouthguards because of its superior fit and retention. In addition, Pro-form mouthguards are thin and comfortable while still maintaining shape and protection long after other mouthguards have worn out.

Pro-form custom-made athletic mouthguards are proven to reduce the incidence of tooth breakage by properly distributing the stress of a hard impact to the entire length of the tooth. A double layer of laminated sheet vinyl and a lingual plate imbedded behind the incisors gives the piece long-lasting durability. The mouthguard maintains its form because of the heat and pressure laminating process. The tensile strength is excellent due to the two layers of laminate while the density is maintained during the pressure laminated process for controlled, uniformed shape.

May reduce concussions Concussions are becoming an epidemic in many sports. With a custom mouthguard, studies have shown a possible reduction in concussion cases.

Protects jaw joint A custom mouthguard absorbs and spreads the impact or blow to the face, which may otherwise result in a major injury to the delicate jaw joint.

Protects soft tissue around the mouth Lacerations, bruised lips, cheeks and gums can result from direct impact to the mouth. The reinforcement of a custom mouthguard can eliminate painful soft tissue injuries.

Cushions teeth from high impact Any sport has a possibility of receiving a heavy blow to the teeth and mouth. Wearing a custom mouthguard during athletic competition decreases the chance of chipping, breaking or knocking out a tooth.

Prevents major head and neck injuries Any impact to the head or jaw can create serious injury. A custom mouthguard diminishes the likelihood of jaw dislodgement or neck trauma.

Used at all levels of competition, Pro-form has proven itself as a top performer on the field when athletes need it the most.

DynaFlex® Glitter Guard

Add a little more flash and sparkle with Glitter Guards! By laminating two layers of soft EVA together, the material has excellent tensile strength. 5"x5" Squares, **6 per package.**

LABORATORY SUPPLIES

Trims the time. Polishes the model.
Pampers your hands.

Introducing a water-soluble tongue void filler that will save you time while producing a sleek model! Pre-mixed, Wonderfill eliminates time spent mixing alginate filler or grinding out plaster or stone from lower impressions. Simply fill the tongue area with Wonderfill and pour the model. Once the model is set, Wonderfill can be removed without sticking. Wonderfill is water soluble and requires no set-up TIME or special clean-up REQUIRED. 51-ounce tub.

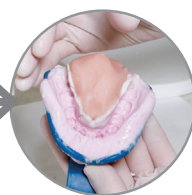

#1549

No mixing, no mess,
no wasted time grinding,
ending in exceptional model
appearance.

Remove a palmful of Wonderfill from tub.

Form a domed bridge in the tongue area.

After plaster/stone fully sets, easily pop out Wonderfill.

With Wonderfill in the tongue area, pour plaster/stone.

DynaFlex® Model Storage Boxes A practical new dimension in orthodontic model storage. Inexpensive, easy to assemble boxes conserve valuable space prior to use. Very sturdy when assembled. Each box has compartments to safely store the models and comes complete with a tray, compartment insert and a sleeve.

4 Compartment Box

Case of 50 boxes: 11" x 3.375" x 1.875"

Hygienic Waxes

Yellow Bite Wafers

Yellow Bite Wafers are a single layer of soft bite wax, U-shaped and designed to adapt to the dental arch. Provides quick, precise bite-checks. 50 wafers per box.

#1306-0839

Extra Hard Green Bite Wafers

These extra hard green bite wafers are non-brittle and won't shatter when chilled. Softens quickly in warm water and can be shaped for full arch coverage. 36 wafers per box.

#1306-3365

Laminated Blue Bite Wafers

Aluminum foil is laminated between two layers of soft bite wax. Aluminum foil lessens distortion and prevents patient from biting through the wafer. 24 wafers per box.

#1306-0825

U-Shaped Occlusal Rims

U-shaped, pink wax blocks. The recessed base aids in adaption to the base plate.

#250-1050 Box of 21

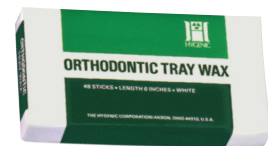

#250-1052 Box of 100

Orthodontic Tray Wax Strips

Used for peripheral lining of impression trays. Increases the tray height. Soft and tacky, and can be adapted without heating. 48 strips per box, each strip 6" x 1/4".

#1306-0827

Utility Wax Strips

Shaped in round strips, used for preserving the periphery roll & extending and building up impression trays and post-damming. Sized 11" long x 3/16". Box of 80.

#O-250-1048

Yellow Bite Wax

Made from a blend of fresh, clean wax and can be used under hot water. Supplied in sheets.

Yellow Check Bite Wafers

A single layer of soft bite wax, U-shaped & designed to adapt to the dental arch. Gives quick, precise check-bites and occlusal transfers.

#O-250-1006 Box of 192

DynaFlex® Sticky Wax

A hard fast-setting wax. Repairs wax patterns and welds waxes together.

Melts at 73°C /163°F.

#O-250-1060 Case of 18 sticks

#O-250-1062 Box of 120 sticks

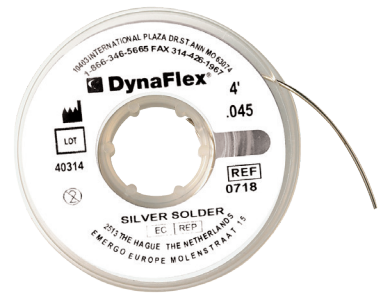

DynaFlex® Silver Solder

Lab technician's love our easy-to-work-with solder because of the smooth flow. Usable with gold, silver or stainless steel. Cadmium free with a melting point of 756 degrees F. The larger gauge enables you to use less and save more. 5-DWT. 4 foot spool.

#0718 .045

#0718-5 .025

DynaFlex® Flux

Smooth quick flowing flux makes your soldering easy and consistent in color. 7 ounce jar.

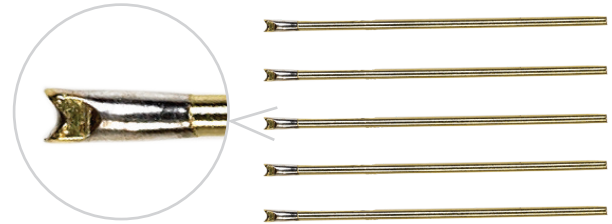

#0719-05

DynaFlex® Notched Electrodes

Silver solder notched electrodes used for soldering elastic hooks, head-gear hooks and stops and tiebacks. 100 per package.

#0720-N

DynaFlex® Ball Electrodes

Silver solder ball electrodes are excellent for reinforcing wires to models, attaching auxiliaries, reinforcing the lingual surface of anterior bands, and work with lingual arches. .032 brass wire. 100 per package.

#0720-A Small

#0720-B Medium

#0720-C Large

DynaFlex® Patient Relief Wax In Bulk Boxes

Makes 540 Wax Packs! Same great high grade wax used in our regular wax packs! Contains 450 strips measuring 12" in length by 3/16" width.

#O-100-1068

L'il Palates™

A simple, yet very useful device used to remove food that gets trapped between the expander and the palate. The soft, flexible plastic hook retracts from the housing similar to a pocketknife design. Sold in pack of 12.

#8010 Blue

#8020 Purple

Cavicide1™

1 minute, 1 Step Surface Disinfectant Liquid. The all new, exceptionally fast and effective CaviCide1 is the next generation surface disinfectant. CaviCide1, a multi-purpose disinfectant/decontaminant cleaner can be used on hard, non-porous surfaces. The improvements found in the latest formulation are effective inkilling 99.9% bacteria, viruses and fungi in 1-minute including TB, Norovirus, A. baumannii, HIV-1, HBV.HCV and many more. When used as directed, the fragrance free CaviCide1 will effectively clean and disinfect surface and can help reduce the risk of cross contamination.

#4060-5000 1 Gallon

#4060-5024 24 Fluid Ounce Spray Bottle

CaviCide1™ Wipes

Disposable towelettes are pre-saturated with CaviCide Surface Disinfectant Cleaner. These wipes are convenient, durable, non-woven, nonabrasive towels that will not bunch up during use. Recommended for nonporous surfaces. The only towelette proven to kill TB in 5 minute and HBV in 3 minutes! 160 Towelettes per canister.

#4060-5100 Regular Size 6" x 6.75" 160/Canister

#4060-5150 XL Size 9" x 12.65" 65/Canister

MEDICA 28™ Plus Cold Sterilant

Eliminate the risk of cross contamination! Health care professionals understand the risk posed by the life-threatening infectious diseases found in today's medical environments-they need to feel secure that their instruments and equipment are free of infectious diseases. Medica 28™ Plus is classified for disinfection and sterilization in the critical and semi-critical categories, Delivering one-step protection in the following areas: Tuberculocidal, Sporicidal, Virucidal, Pseudomonacidal, Bactericidal and Fungicidal. Designed for use on sharp instruments, instruments with a lens, thermometers, anesthesia equipment, metal objects, respiratory therapy equipment, rubber and plastic objects and flexible fiber-optic endoscopes. Mild pleasant odor, contains no phenol, the new solid activator assures a consistent efficacy level throughout 28 days of continuous use. 1 gallon.

#4006-02
